

## CALL FOR PAPERS

### Tuberculosis in wildlife

---

With the apparent and almost global resurgence of tuberculosis in wild animals, *Epidemiology and Infection* is planning an issue devoted to this subject in early 2013.

We would like to invite our readers to submit original, short or review papers. These should deal predominantly with wildlife but have relevance to human.

Papers should be submitted as soon as possible, and at the latest by 31st October 2012 (please see the Instructions for Contributors for the correct format

of text and references). All those submitted will be assessed initially by the Editors and, if suitable, by independent reviewers.

Please mark all manuscripts clearly as ‘For Special Issue-TB in wildlife’ on the manuscript and also in your covering letter.

NORMAN NOAH  
Editor
