

JOURNAL OF FLUID MECHANICS

Edited by G. K. BATCHELOR AND H. K. MOFFATT

Volume 28, Part 3. 26 May 1967

Initial motion of a bubble in a fluidized bed. Part 1. Theory

J. D. MURRAY

Initial motion of a bubble in a fluidized bed. Part 2. Experiment

B. A. PARTRIDGE and E. LYALL

Note on the effect of a nearby obstacle on turbulence intensity in a boundary layer

D. J. TRITTON

Some new correlation measurements in a turbulent boundary layer

D. J. TRITTON

The spin up of a stratified fluid

JOSEPH PEDLOSKY

On long waves with cross-wind in an atmosphere

M. C. SHEN

Instability of laminar flows due to a film of adsorption

CHIA-SHUN YIH

The vortex wakes of vibrating cylinders at low Reynolds numbers

G. H. KOOPMANN

An axisymmetric similarity solution for viscous-transonic nozzle flow

M. SICHEL and Y. K. YIN

Formation of ribs on rotating rollers

C. C. MILL and G. R. SOUTH

Experiments on Ekman layer instability

P. R. TATRO and E. L. MOLLO-CHRISTENSEN

The time-dependent motion due to a cylinder moving in an unbounded rotating or stratified fluid

F. P. BRETHERTON

On the suppression of turbulence by a uniform magnetic field

H. K. MOFFATT

Calculation of boundary-layer development using the turbulent energy equation

P. BRADSHAW, D. H. FERRISS and N. P. ATWELL

JOURNAL OF PLASMA PHYSICS

Vol. 1 Part 3 August 1967

CONTENTS

On ion-electron beams emitted by a plane Y. Y. WINOGRAD	page 267
Wave propagation in non-uniform plasmas near the second electron cyclotron harmonic D. E. BALDWIN	289
The guiding centre approximation in lowest order A. BAÑOS, JR.	305
Model Fokker-Planck Equations. 2. The equation for a multi- component plasma J. P. DOUGHERTY and S. R. WATSON	317
Model Fokker-Planck Equations. 3. Application to transport phenomena J. P. DOUGHERTY, S. R. WATSON and M. A. HELLBERG	327
The evolution of wave correlations in uniformly turbulent, weakly non-linear systems R. C. DAVIDSON	341
Propagation of hydromagnetic waves through an anisotropic plasma B. ABRAHAM-SHRAUNER	361
Shock jump conditions for an anisotropic plasma B. ABRAHAM-SHRAUNER	379
Book Review	382
