Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

Network Science Editorial Team

EDITORS
Ulrik Brandes, Computer Science and Mathematics, ETH Zürich, Switzerland
Ronald Breiger, Social and Political Science, University of Arizona, USA
Noshir Contractor, Communication, Management, and Computational Social Science, Northwestern University, USA
Filippo Menczer, Information Science, Indiana University, USA
Jalaloddin Svetlizkava, Engineering and Web Science, University of Minnesota, USA
Thomas Valente, Public Health and Medicine, University of Southern California, USA
Fernando Vega-Redondo, Economics, Bocconi University, Italy
Alessandro Vespignani, Physics, Northeastern University, USA
Stanley Wasserman (Coordinating Editor), Statistics and Behavioral Science, Indiana University, USA

ASSOCIATE EDITORS
Sinan Aral, Information Science, Management, New York University, USA
Alin Bavar, Physics, CNRS, France
Yann Bramoulle, Economics, Aix-Marseille University, France
Dirk Brockmann, Computer Science, Applied Mathematics, Northwestern University, USA
Nicholas Christakis, Sociology, Medicine, Public Health, Yale University, USA
Jonathan Cummings, Business, Duke University, USA
Padraig Cunningham, Computer Science, University College Dublin, Ireland
Matthew Elliott, Economics, California Institute of Technology, USA
Christos Faloutsos, Computer Science, Data Mining, Carnegie Mellon University, USA
Katherine Faust, Sociology, University of California, Irvine, USA
James Fowler, Political Science, Public Health, Genomics, University of California, San Diego, USA

Andrea Galeotti, Economics, University of Essex, UK
David Hunter, Statistics, Pennsylvania State University, USA
Yoshimasa Kishima, Psychology, University of Melbourne, Australia
Peter Key, Mathematics, Microsoft Research, UK
Laura Kochly, Psychology, Public Health, National Institutes of Health, USA
Eric Kolaczyk, Statistics, Boston University, USA
David Krackhardt, Public Policy, Business, Carnegie-Mellon University, USA
David Lazer, Information Science, Political Science, Northeastern University, USA
Roger Lemmers, Business, Organization Studies, Tilburg University, Netherlands
Kristina Lerman, Computer Science, ISI and University of Southern California, USA
Mark Lubell, Political Science, Environmental Policy, University of California, Davis, USA
Winter Mason, Psychology, Cognitive Science, Stevens Institute, USA
James Moody, Sociology, Duke University, USA
Sue Moon, Computer Science, Korea Advanced Institute of Science and Technology, Republic of Korea
Romualdo Pastor-Satorras, Mathematics, Physics, Polytechnic University of Catalonia, Spain
Bernice Pesando, Sociology, Indiana University, USA
Richard Rehberger, Public Health, Epidemiology, Georgia State University, USA
Olf Sporns, Psychology, Neuroscience, Indiana University, USA
Douglas Steinley, Psychology, Statistics, University of Missouri, USA
Adam Szell, Economics, Central European University, Hungary
Zoltan Toroczkai, Physics, University of Notre Dame, USA
Marc van der Laan, Economics, University of Amsterdam, Netherlands

Managing Editor
Ann McCranie, Sociology, Indiana University, USA

Network Science

Network Science is an important journal for an important discipline - one using the network paradigm, focusing on actors and relational linkages, to inform research, methodology, and applications from many fields across the natural, social, engineering and informational sciences. Given growing understanding of the interconnectedness and globalization of the world, network methods are an increasingly recognized way to research aspects of modern society along with the individuals, organizations, and other actors within it.

The discipline is ready for a comprehensive journal, open to papers from all relevant areas. Network Science is defining a new field, shaping this new discipline. The journal welcomes contributions from researchers in all areas working on network theory, methods, and data.

SUBSCRIPTION INFORMATION
Network Science (ISSN: 2050-1242) is published four times per year, in March, June, September, and December by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

The subscription price of Volume 6 (2018) including delivery by air where appropriate (but excluding VAT), is US$740.00 (£462.00) for institutions and core dominance in binary and valued networks
Power-relational core–periphery structures: Peripheral dependency and core dominance in binary and valued networks
CARL NORDLUND
Multivariate dynamics of one-mode and two-mode networks: Explaining similarity in sports participation among friends
KAYO FUJIMOTO, TOM A. B. SNIDERS AND THOMAS W. VALENTÉ
Familiar faces, familiar spaces: Social similarity and co-presence in non-relational behavioral convergence
RACHEL BEHLER, CHAN SUH, MATTHEW BRASHEARS AND YONGREN SHI

CONTENTS
Volume 6 Number 3

Articles
Clustered networks protect cooperation against catastrophic collapse
GWEN SPENCER
The perception of status: How we infer the status of others from their social relationships
NATHAN BETANCOURT, BALÁzs KOVÁCS AND SARAH M. G. OTNER
