International Psychogeriatrics
Scope and contributions

International Psychogeriatrics is written and read by those doing clinical, teaching, and research work with older people. It is the official journal of the International Psychogeriatric Association (IPA) and is published by Cambridge University Press, Cambridge, UK. Although it is primarily concerned with psychogeriatrics, the journal welcomes contributions from all concerned with the field of mental health and aging.

Contributions include original research articles, case reports, editorials, books reviews (to be submitted via the IPA’s website: www.ipa-ps.com), and short communications. However, contributions in the form of voluntary translations of articles from other languages is also welcomed. All contributions must be original works of the authors and thus not under any other form of peer-review. Simultaneous submission of papers to other journals and conferences is also prohibited.

All contributors to International Psychogeriatrics are required to check compliance with the Declaration of Helsinki. For more information, please visit the journal’s website: https://www.cambridge.org/ipg.

All authors are expected to adhere to the highest standards of professional conduct and integrity in all aspects of scientific work. This includes the ethical responsibilities of authors, reviewers, editors, and publishers. These guidelines are based on the standards set by the Committee on Publication Ethics (COPE), the International Committee of Medical Journal Editors (ICMJE), and the World Medical Association Declaration of Helsinki.

All authors must declare any potential conflicts of interest. This information should be declared at the time of submission.

Enquiries about ethical issues should be sent to the journal’s Ethics Officer, Cambridge University Press.

For more information on ethical guidelines, please visit the journal’s website: https://www.cambridge.org/ipg.
