

# ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OCTOBER 1979

VOL. 29 PART 2

Longman 

INFORMATION FOR CONTRIBUTORS TO  
*ANIMAL PRODUCTION*

Detailed notes for guidance in the preparation of manuscripts are printed in Volume 25: pages ix to xxii. A few general points are given below.

*Animal Production* publishes reports in English of *original* work in the field of animal production or in any related scientific field. The Editors will consider articles on any aspect of research or development, providing the work described has been carried out in a systematic way, and articles critically re-examining published information. Reviews of literature are not accepted. Papers presenting a detailed description of a technique or of equipment will be considered only if the technique or equipment has been used in experiments, the results of which are included in the same paper or a subsequent paper within a series. Results of research work which do not warrant presentation as a full paper may be submitted for consideration as *Notes*. Notes are not intended for the publication of interim results. They must not exceed 2000 words or the equivalent inclusive of tables and illustrations. Proprietary preparations used as a source of material in experimental comparisons may be referred to by their trade names, in the Material and Methods section only, if this is seen as helpful to readers. Papers describing work designed merely to evaluate proprietary preparations will not be accepted.

Papers are published on the understanding that they have not been and, with the exception of authors' abstracts, will not be published elsewhere without the Editors' written permission. Authors' abstracts can be reproduced if full acknowledgement of the source is made.

*Manuscripts* should be typewritten on one side of the paper in double-line spacing with wide margins. Each page and the lines on each page should be numbered. Three, or exceptionally two, copies, one of which must be the original, of the typescript and illustrations should be sent to

Professor J. A. F. Rook,  
Animal Production,  
The Hannah Research Institute,  
Ayr KA6 5HL, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

*Units of measurement.* The International System of Units (SI) should be used, with the recommendations and modifications in *Quantities, Units and Symbols*, The Royal Society, London, 1975, and *Metric Units, Conversion Factors and Nomenclature in Nutritional and Food Sciences*, The Royal Society, London, 1972—reproduced in *Proc. Nutr. Soc.* 31: 239–247, 1972.

*Symbols and abbreviations.* Authors should consult the notes prepared for guidance. Levels of statistical significance must be clearly indicated.

*Illustrations.* The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board, stout tracing paper or plastic film.

# The Index to Scientific & Technical Proceedings™

will help you find the proceedings literature  
of interest to you.

Use the coupon below to receive more information about *ISTP*™!

- The *Index to Scientific & Technical Proceedings* indexes over 3,100 proceedings volumes a year and more than 100,000 individual papers from conferences held throughout the world. *ISTP* indexes proceedings wherever they appear... in periodicals, multi-authored books or report series.
- Proceedings are presented in a table-of-contents format that makes them easy to scan and users can quickly see every paper included in the proceedings volume.
- First authors' addresses are included to facilitate correspondence and reprint requests.
- *ISTP*'s coverage includes all major scientific and engineering disciplines.
- *ISTP* is issued monthly to provide current access to relevant information.
- *ISTP* includes six index sections that enable the user to find items of interest to the level of individual papers. With the category index, users can quickly scan relevant proceedings in their disciplines.
- *ISTP* is the most comprehensive reference source available to the proceedings literature.

Attention ISI® :

Send me your booklet describing *ISTP*™ so I may learn more about this index.

# Feeding Beef Cattle

1979. 31 figures, 23 tables. Approx. 150 pages  
(Advanced Series in Agricultural Sciences, Volume 7)  
Cloth DM 48,—; US \$26.40  
ISBN 3-540-09198-X

Prices are subject to change without notice

Written by one of the world's foremost experts in beef cattle feeding, this timely book details the nutrient requirements of cattle as well as the consequences of excessive nutrient feeding. The various feeds available and their relative values in beef cattle diets are discussed along with the climatic conditions, types of soil, and the economics of producing certain feeds. Substitute feeds are dealt with in depth. The expediency of different cattle feeding programs is outlined, and the use and value of feed additives and growth stimulants are considered.

The author, whose experience spans a period of thirty years, has had a far-reaching impact on the growth and development of the feedlot industry. His up-to-date and comprehensive book offers scientists, beef cattlemen and students all the facts they need to understand beef cattle nutrition and to plan feeding programs suited to individual needs.

**Contents:**

Nutrients. — Classification of Feeds. — Procedures in Ration Formulation. — Processing Feeds for Beef Cattle. — Systems of Feeding. — Feed Additives. — Growth Stimulants.
