

BJN**BRITISH JOURNAL
OF NUTRITION****Editor-in-Chief**G C Burdge, *University of Southampton, UK*

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multi-disciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology, and the emerging area of nutritional genomics.

Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn.edoffice@cambridge.org

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Monitoring salt and iodine intakes in Dutch adults between 2006 and 2010 using 24 h urinary sodium and iodine excretions
MAH Hendriksen, JMA van Raaij, JM Geleijnse, C Wilson-van den Hooven, MC Ocké and DL van der A 1431

Misperception of body weight among overweight Danish adults: trends from 1995 to 2008
J Matthiessen, A Biloft-Jensen, S Fagt, VK Knudsen, I Tetens and MV Groth 1439

Effect of increasing voluntary folic acid food fortification on dietary folate intakes and adequacy of reproductive-age women in New Zealand
SE Evans, VL Mygind, MC Peddie, JC Miller and LA Houghton 1447

A comparison of the nutritional quality of organic and conventional ready-to-eat breakfast cereals based on NuVal scores
NJ Woodbury and VA George 1454

Assessment and methodology

Relative validity and reproducibility of a quantitative FFQ for assessing nutrient intakes of vegetarians in Taiwan
THT Chiu, H-Y Huang, K-J Chen, Y-R Wu, JPC Chiu, Y-H Li, BC-H Chiu, C-L Lin and M-N Lin 1459

Validation of an FFQ to assess antioxidant intake in overweight postmenopausal women
M Yang, Y Wang, CG Davis, SG Lee, M Luz Fernandez, SI Koo, E Cho and OK Chun 1467

Dietary patterns in UK adolescents obtained from a dual-source FFQ and their associations with socio-economic position, nutrient intake and modes of eating
K Northstone, ADAC Smith, VL Cribb and PM Emmett 1476

The reliability and relative validity of a diet index score for 4–11-year-old children derived from a parent-reported short food survey
GA Hendrie, EV Smith and RK Golley 1486

Epidemiology

Serum ferritin contributes to racial or geographic disparities in metabolic syndrome in Taiwan
J-S Chang, S-M Lin, JC-J Chao, Y-C Chen, C-M Wang, N-H Chou, W-H Pan and C-H Bai 1498

Adherence to a snacking dietary pattern and soda intake are related to the development of adiposity: a prospective study in school-age children
MR Shroff, W Perng, A Baylin, M Mora-Plazas, C Marin and E Villamor 1507

Breast-feeding in relation to weight retention up to 36 months postpartum in the Norwegian Mother and Child Cohort Study: modification by socio-economic status?
M Brandhagen, L Lissner, AL Brantsaeter, HM Meltzer, A-P Häggkvist, M Haugen and A Winkvist 1514

Serum leptin concentrations in relation to dietary patterns in Chinese men and women
H Zuo, Z Shi, Y Dai, B Yuan, G Wu, Y Luo and A Hussain 1524

Dietary patterns and the risk of non-Hodgkin lymphoma
NJ Ollberding, B Aschebrook-Kilfoy, DBD Caces, SM Smith, DD Weisenburger, BC-H Chiu 1531

Psychological distress, gender and dietary factors in South Asians: a cross-sectional survey
M Bhattacharyya, L Marston, K Walters, G D'Costa, M King and I Nazareth 1538

Non-Western immigrant children have lower 25-hydroxyvitamin D than children from Western families
JA Omand, PB Darling, PC Parkin, CS Birken, M Khovratovich, KE Thorpe, S Carsley, J DeGroot and JL Maguire on behalf of the TARGet Kids! Collaboration 1547

Consumption of foods with voluntary fortification of micronutrients in southern Brazil: prevalence and associated factors
ACL Cirino, R de Vargas Zanini and DP Gigante 1555

Diet-related practices and BMI are associated with diet quality in older adults
DW Ford, TJ Hartman, C StIII, C Wood, D Mitchell, PY Hsiao, R Bailey, H Smiciklas-Wright, DL Coffman and GL Jensen 1565

Nutrition and health

Nutritional status and childhood wheezing in rural Bangladesh
MDH Hawlader, E Noguchi, S El Arifeen, LÅ Persson, SE Moore, R Raqib and Y Wagatsuma 1570

Home fortification with calcium reduces Hb response to iron among anaemic Bangladeshi infants consuming a new multi-micronutrient powder formulation
WU Khan, S Shafique, H Shikder, YA Shakur, DW Sellen, JS Chowdhury and SH Zlotkin 1578

Macronutrient intake and type 2 diabetes risk in middle-aged Australian women. Results from the Australian Longitudinal Study on Women's Health
A Alhazmi, E Stojanovski, M McEvoy and ML Garg 1587

Egg consumption and insulin metabolism in the Insulin Resistance Atherosclerosis Study (IRAS)
C-TC Lee, AD Liese, C Lorenzo, LE Wagenknecht, SM Haffner, MJ Rewers and AJ Hanley 1595

Dietary intake and body composition in HIV-positive and -negative South African women
SV Wrottesley, LK Micklesfield, MM Hamill, GR Goldberg, A Prentice, JM Pettifor, SA Norris and AB Feeley 1603

Interventions

Resolution of Bitot's spots following mega-dose vitamin A supplementation in children between 1 and 5 years of age
U Kapil, S Dwivedi, HS Sachdev, SN Dwivedi, RM Pandey, H Hirdyani and A Upadhyay 1614

Impact of an education intervention using email for the prevention of weight gain among adult workers
PC Jaime, DH Bandoni and F Sarno 1620

Marketing and communication

Eating for the better: a social marketing review (2000–2012)
JE Carins and SR Rundle-Thiele 1628

Public policies

What, not just salad and veg? Consumer testing of the *eatwell week*
WS Leslie, J Eunson, L Murray, MEJ Lean and GR Hankey 1640

The Australian Food and Health Dialogue – the implications of the sodium recommendation for pasta sauces
H Trevena, E Dunford, B Neal and J Webster 1647

Special groups

Environmental factors associated with disordered weight-control behaviours among youth: a systematic review
ML Wang, KE Peterson, MC McCormick and SB Austin 1654

Corrigendum

Non-Western immigrant children have lower 25-hydroxyvitamin D than children from Western families – CORRIGENDUM
JA Omand, PB Darling, PC Parkin, CS Birken, M Khovratovich, KE Thorpe, S Carsley, J DeGroot and JL Maguire on behalf of the TARGet Kids! Collaboration 1668
