Mathematika

VOLUME 65  PART 2  2019

Harry Metrebian  Tiling with punctured intervals  181–189
Peter Sjögren and Tomasz Z. Szarek  Analysis in the multi-dimensional ball  190–212
A. G. Earnest and Anna Haensch  Completeness of the list of spinor regular ternary quadratic forms  213–235
Allysa Lumley  Complex moments and the distribution of values of \( L(1, \chi_D) \) over function fields with applications to class numbers  236–271
Alexandre Girouard, Jean Lagacé, Iosif Polterovich and Alessandro Savo  The Steklov spectrum of cuboids  272–310
Han Yu  Dimensions of triangle sets  311–332
Mark Watkins  Class number one from analytic rank two  333–374
Andrew R. Booker, Micah B. Milinovich and Nathan Ng  Quantitative estimates for simple zeros of \( L \)-functions  375–399
Manfred G. Madritsch and Robert F. Tichy  Multidimensional van der Corput sets and small fractional parts of polynomials  400–435
