Life Sciences
Books and Journals from
Cambridge University Press

Cambridge is one of the leading publishers in ecology and conservation biology and publishes high quality texts and research across the breadth of the life sciences, focusing particularly on animal behaviour, biological anthropology, evolutionary biology, computational and systems biology, as well as statistics and professional development titles for biologists.

We also have an extensive portfolio of established journals in agriculture, ecology and conservation, and animal science.

Medicine
Books and Journals from Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.

For further details visit: cambridge.org/core-medicine
This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world’s forests.

Parasitology

EDITOR-IN-CHIEF
R. S. PHILLIPS

EDITORIAL POLICY
Parasitology publishes definitive papers on all aspects of pure and applied parasitology including biochemistry, molecular biology, immunology, genetics, ecology and physiology and also the application of new techniques, long-term epidemiology studies, advances in the understanding of life-cycles, chemotherapy and major systematic revisions. Papers should normally be full length with an explanatory introduction and detailed discussion of the findings reported. Shorter reports of particularly important findings will also be considered.

To submit papers online, go to http://mc.manuscriptcentral.com/par/

Para dis tology (ISSN 0031–1820) is published monthly and semi-monthly in April and September. Subscriptions may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. All orders must be accompanied by payment.

Details of advertising in Parasitology may be obtained from the publisher.

Front Cover illustration: The functional mechanism of anti-merozoite antibodies. Antibodies to merozoite surface proteins can mediate several effector mechanisms, including complement fixation due to cytophilic antibodies that result in merozoite lysis of C3b opsonization; inhibition of merozoite invasion into the RBC; phagocytosis of IgG-opsonized merozoites; production of reactive oxygen species (ROS) or Nitric oxide (NO) in response to opsonized parasites and antibody dependent cellular inhibition (ADCI) triggered by IgG-opsonized merozoites. From Healer et al., Vol. 145 (7), pp. 839-847.

REVIEW ARTICLES

Gladiolus duxonella in the UK: current knowledge of risk factors and public health implications
B. Horton, H. Bride, C. J. Alexander and A. K. Kizio

Anthelmintic resistance and novel control options in equine gastrointestinal nematodes
Ali Raza, Abdul Shaffer Garme, Khizar Hayat, Shoib Ahmad and Andrew F. Williams

A tale of three kingdoms: members of the Phylum Nematoda independently acquired the detoxifying enzyme cyanase through horizontal gene transfer from plants and bacteria
D. S. Zarling, M. Mifune, P. Thompson, R. Taga and E. P. Hoberg

The drivers and consequences of unstable Plasmodium dynamics: a long-term study of three malaria parasite species infecting a tropical lizard
Luisa Olano, J. A. Schülein, A. Schlott, C. Cruz and N. A. A. A, A. A. Ali

Accurate identification of Australian mosquitoes using protein profiling
Andrew L. Lawrence, Jana Bab, Cameron E. Webb, Stacey E. Lynch, Mark J. Blacket, Jan Šlapeta, Alexandre A. G. and Philippe Parola

Hexokinase as a versatile molecular genetic marker for Microsporidia
Yut S. Takeda, Sangye A. Timotou, John M. Molyne, A. Alexander, V. Tavosani, K. Ignatova, O. Tomova and V. de Veyca

Phagocytosis and comprehensive revision of mengaiid-feeding myxobolids (Myxozoa, Myxobolidae), with the morphological and molecular redescription of the cryptic species Myxobolus exiguus
S. Rocha, C. Abreu, E. Oliveira, A. Alves, A. Antunes, P. Rodrigues and G. Casal

RESEARCH ARTICLES

Infection patterns of trematodes across size classes of an invasive snail species using field and laboratory studies
Rebecca Z. Bach, Matthew Rittenhouse, Gregory J. Sandland and Jennifer A. H. Koop

The alcohol dehydrogenase with a broad range of substrate specificity regulates vitality and reproduction of the plant-parasitic nematode Bursaphelenchus xylophilus
Linsong Wang, Tingjie Zhang, Zhengyong Pan, Lui Lin, Guangping Ding, Min Wang and Ronggui Li

Stichodactyla infections in internal organs of short-horn sculpin (Myoxocephalus scorpius) collected around an industrial harbour in Nuuk, Greenland
M. D. Iper, Linda Bostan, Lisa B. Christian, Sonne, Reanu Romberg and Barbara Novak

The leishmanial activity of artemisinin is mediated by cleavage of the endoperoxide bridge and mitochondrial dysfunction
Skitria De Sarkar, Dilibina Sarkar, Avijit Sarkar, Ashwarya Debnath, Sashanka Chakrabarti, Kiran Dhar and Mitali Chattarjee

Evaluation of salinomycin isolated from Streptomyces albus JSY-2 against the ciliate, Ichthyophthirius multifiliis
Jie Yan, Ming-Yue Gao, Yong-Hi-A, Yan-Wu Wu, Wen Lin, Ze Zheng, Qin-Lin Yang, Hai-Bin Huang, Chun-Feng Wang, Jin-Yu Zhao and Zhi-Ming Xie

Insights into the metabolisim and behaviour of Vamos destructor flies from analysis of their waste excretions
Francisco Posada-Pérez, Daniel E. Sorenson, Relko I. Egil, Ollie R. Lupton and Steven C. Cock

Trichostatin A induces Trypanosoma cruzi histone and tubulin acetylation: effects on cell division and microtubule cytoskeleton remodelling
Jean de Oliveira Santos, Aline Araújo Zuma, Francisca Nathalia de Luna Worren, Jhaneira Chagas da Cunha, Wanderley de Souza and Maria Cristina M. Motta
