FINANCIAL HISTORY REVIEW
(Printed in the United Kingdom by Bell & Bain Ltd, Glasgow)

INSTRUCTIONS FOR CONTRIBUTORS

Editorial policy
Financial History Review, published by Cambridge University Press on behalf of the European Association for Banking and Financial History A.V. is the leading academic journal devoted to the scholarly study and analysis of economic, financial, fiscal, banking and financial subjects, with a particular focus on the period 1450-1900. It offers an opportunity for scholars working on financial topics to publish their work to a broad audience, and invites contributions on any subject, historical period and regional area. The Review particularly encourages submissions from young scholars.

Authors should normally be of 8,000 words including footnotes, tables and any other illustrative material (a graph accepting an 8-page page is deemed equivalent to 10,000 words). The journal is published in English and contributions should be submitted in that language. Authors whose native language is other than English are encouraged to submit manuscripts in a professional native translation for a preliminary review prior to submission.

Submissions
Manuscripts must be submitted through the online submission facility available on the Review’s web-page http://journals.cambridge.org/FHR. Authors are required to apply.

Preparation of manuscripts
1. Manuscripts should be blind double-spaced throughout on A4 or 8½ × 11 in, 12 point Times New Roman, 1.5 or double spaced, as appropriate. Where possible, manuscripts should be divided into sections designated by Roman numerals centred on the page. Sub-headings within an article should be avoided. Authors are required to upload:
   a) a cover page with title, author(s)’ name and affiliation, and full contacts of the corresponding author (e-mail and telephone numbers are compulsory);
   b) a blinded copy of the manuscript. The cover page of the document should include the paper’s title, a short abstract (max. 200 words), a short list of keywords, JEL codes, and 3-5 corresponding author keywords (including a summary, a list of bibliographical references, appendix) and a different single document in PDF for Tables and Figures.

2. Financial History Review’s policy for open access is that it is published in English only and is not being considered for publication elsewhere. Upon acceptance of a paper, the author will be asked to sign open access (on certain conditions) to the European Association for Banking and Financial History A.V.

Contributors are responsible for obtaining permission to reproduce any material in which they do not own copyright, to be used in both print and electronic media, and for ensuring that the appropriate acknowledgements are included in their manuscript.

Typeset by Japan Times, Tokyo.

Proofs
Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Corrections
1. Spelling: British spelling is preferred, using -s in words with alternative -ce. However, American spelling will be accepted.

2. Foreign words or phrases in an English sentence should be underlined (for italic), except for proper names, or quotations or words in common use.

3. Quotations: follow the punctuation, capitalization and spelling of the original source. Within the body of the text, a quotation should appear in italics, with end-of-quote marks left off. Where absolutely necessary, non-English words may be given in roman type. In this case, the original text should be included in brackets.

4. Numbers: roll out number up to ten, but use Arabic numerals thereafter. In tables, numbers of spaces should be avoided. All numbers should be rounded to the nearest whole number, unless the context requires otherwise.

5. Dates: American-style dates (December 3rd, 2004, or December 3, 2004) are to be used in the text. The corresponding author should be asked to confirm which date format is to be used in footnotes and tables. Standard fractions can be used in tables.

6. Italic: whether within, or at the end of a sentence should be indicated by three spaced full stops. Extensive quotations from non-English language sources should be translated into English in the text and (if necessary) the original text supplied elsewhere. Proper names in contemporary Latin sources are to be italicised. Latin words which appear as English words should be elided to the smallest unit, e.g. Romanus (Romanus). Marks. Extensive quotations from non-English language sources should be translated into English in the text and (if necessary) the original text supplied elsewhere.

7. Abbreviations: if the paper includes extensive references to primary sources such as archives, statistics, periodicals, yearbooks and documentary sources, these should be cited in the footnotes, hence (e.g. 1750, 1828; 1750/1828).

8. Italic: whether within, or at the end of a sentence should be indicated by three spaced full stops. Use typed Latin manuscripts in parallel columns.

9. References to archival sources must include the name and location of the collection, and the file where the document can be found. References should follow accepted national styles, e.g. giving an extended version for the first document cited from a source, e.g., International Monetary Fund, Annual Financial Statistics (Washington DC).

10. Table and Graphs: Table and figures, and maps should be numbered. They should include a title, and be numbered in order of appearance and provide details of the corresponding sources.
