JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

For more information visit journals.cambridge.org/rapids
With two new Editors and seven new Associate Editors joining the editorial team Journal of Plasma Physics aspires to be the intellectual home of those who think of plasma physics as a fundamental discipline. The journal will particularly focus on publishing research on laboratory plasmas, space physics and plasma astrophysics that takes advantage of the rapid ongoing progress in instrumentation and computing to advance fundamental understanding of multiscale plasma dynamics.
The ANZIAM Journal considers papers in any field of applied mathematics and related mathematical sciences with the aim of rapid publication in print and electronic formats. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.
1 Wrapping up a century of splashes
D. van der Meer

5 Ventilated cavities on a surface-piercing hydrofoil at moderate Froude numbers: cavity formation, elimination and stability
C. M. Harwood, Y. L. Young & S. L. Ciceo

57 Dynamics of hemiwicking
J. Kim, M.-W. Moon & H.-Y. Kim

72 Reduced-order modelling of the flow around a high-lift configuration with unsteady Coanda blowing
R. Semaan, P. Kumar, M. Burnazzi, G. Tissot, L. Cordier & R. R. Nauck

111 High-frequency effective viscosity of a dilute suspension of particles in Poiseuille flow between parallel walls
F. Feuillebois, M. E. Ekiel-Jezewska, E. Wajnryb, A. Seller & J. Bławzdziewicz

140 Dense gas effects in inviscid homogeneous isotropic turbulence
L. Sciaccoewi, P. Cinnella, C. Content & E. Grasso

180 The history effect in bubble growth and dissolution. Part I. Theory
P. Peñas-López, M. A. Parrales, J. Rodríguez-Rodríguez & D. van der Meer

213 Gravitational waves in a differentially rotating spherical shell
G. M. Mirouh, C. Baruteau, M. Rieutord & J. Ballot

248 Lift on side-by-side intruders within a granular flow
R. A. López de la Cruz & G. A. Caballero-Rohledo

264 Interaction forces between microfluidic droplets in a Hele-Shaw cell
I. Sarig, Y. Starosvetsky & A. D. Gat

278 Exact solutions to non-classical steady nozzle flows of Bethe–Zel’dovich–Thompson fluids
A. Guardone & D. Vimercati

307 Existence of a sharp transition in the peak propulsive efficiency of a low-Re pitching foil

327 A self-consistent formulation for the sensitivity analysis of finite-amplitude vortex shedding in the cylinder wake
P. Meliga, E. Bonju & F. Gallaire

358 Measurements of passive scalar diffusion downstream of regular and fractal grids
J. Nedík & S. Tavoularis

387 Acoustic, hydrodynamic and thermal modes in a supersonic cold jet
S. Unnikrishnan & D. V. Gaitonde

433 Flow generated by oscillatory uniform heating of a rarefied gas in a channel
J. Nassios, Y. W. Yap & J. E. Sader

484 Dynamics of red blood cells in oscillating shear flow
D. Cordasco & P. Bagchi

517 Transient dynamics of an elastic Hele-Shaw cell due to external forces with application to impact mitigation
A. Tulchinsky & A. D. Gat

531 The effect of thermal boundary conditions on forced convection heat transfer to fluids at supercritical pressure
H. Nemati, A. Patel, B. J. Boersma & R. Pecnik

557 Structure and location of branch point singularities for Stokes waves on deep water
P. M. Lushnikov
