

GENETICAL RESEARCH

EDITORIAL BOARD

C. H. WADDINGTON (*Chairman*)
CHARLOTTE AUERBACH D. LEWIS
H. GRÜNEBERG G. PONTECORVO
W. HAYES A. ROBERTSON

EXECUTIVE EDITOR

E. C. R. REEVE

Volume 6. 1965

CAMBRIDGE
AT THE UNIVERSITY PRESS

1965

*Printed in Great Britain by Spottiswoode, Ballantyne & Co. Ltd.
London and Colchester
and published by the Cambridge University Press
Bentley House, 200 Euston Road, London, N.W.1
American Branch: 32 East 57th Street, New York, N.Y. 10022
Agents in Canada: The Macmillan Company of Canada Limited*

CONTENTS

No. 1 (February 1965)

BOWLER, K. and HOLLINGSWORTH, M. J. The effect of inbreeding on temperature acclimatization in <i>Drosophila subobscura</i>	page 1
DORN, G. Genetic analysis of the phosphatases in <i>Aspergillus nidulans</i>	13
WHITEHOUSE, H. L. K. and HASTINGS, P. J. The analysis of genetic recombination on the polaron hybrid DNA model	27
SAKAI, KAN-ICHI and SHIMAMATO, YOSHIYA. A developmental-genetic study on panicle characters in rice, <i>Oryza sativa</i> L.	93
HOLLIDAY, ROBIN. Induced mitotic crossing-over in relation to genetic replication in synchronously dividing cells of <i>Ustilago maydis</i>	104
FINCHAM, J. R. S. and STADLER, D. R. Complementation relationships of <i>Neurospora am</i> mutants in relation to their formation of abnormal varieties of glutamate dehydrogenase	121
WILKIE, D. and LEE, B. K. Genetic analysis of actidione resistance in <i>Saccharomyces cerevisiae</i>	130
MOURAD, ABD EL-KHALEK. Genetic divergence in M. Vetukhiv's experimental populations of <i>Drosophila pseudoobscura</i> . 2. Longevity	139
CLOWES, R. C., MOODY, E. E. M. and PRITCHARD, R. H. The elimination of extrachromosomal elements in thymineless strains of <i>Escherichia coli</i> K12	147
GLOVER, S. W. and COLSON, C. The breakdown of the restriction mechanism in zygotes of <i>Escherichia coli</i>	153

No. 2 (July 1965)

GERSHENSON, S. Induction of lethal mutations in <i>Drosophila melanogaster</i> by DNA	page 157
MATHEW, C. The production of recessive lethals by calf-thymus DNA in <i>Drosophila</i>	163
NASH, D. The expression of 'Hairless' in <i>Drosophila</i> and the role of two closely linked modifiers of opposite effect	175
CASSELTON, LORNA A. The production and behaviour of diploids of <i>Coprinus lagopus</i>	190
ASHTON, G. C. and LAMPKIN, G. H. Transferrin and post-albumin polymorphism in East African cattle	209
SCOTT-EMUAKPOR, M. B. Genetic recombination in <i>Neurospora crassa</i> and <i>N. sitophila</i>	216
SCOTT-EMUAKPOR, M. B. Interference studies in <i>Neurospora crassa</i> and <i>N. sitophila</i>	226
McLAREN, ANNE and WALKER, P. M. B. Genetic discrimination by means of DNA/DNA binding	230
HOPWOOD, D. A. New data on the linkage map of <i>Streptomyces coelicolor</i>	248
GRÜNEBERG, H., GRAY, JEAN M. and TRUSLOVE, GILLIAN M. Congenital defects as indicators of lifelong abnormal processes	263
FARGIE, BARBARA and HOLLOWAY, B. W. Absence of clustering of functionally related genes in <i>Pseudomonas aeruginosa</i>	284
Low, B. and WOOD, T. H. A quick and efficient method for interruption of bacterial conjugation	300
REEVE, E. C. R. and BISHOP, J. O. Multi-step resistance to Chloramphenicol in RC-stringent <i>Escherichia coli</i> K12—its effect on the induction of RNA synthesis by antibiotics under amino acid starvation	304
REEVE, E. C. R. and BISHOP, J. O. Variations in resistance to three antibiotics among some single-step mutants to Chloramphenicol resistance in a strain of <i>Escherichia coli</i> K12	310

No. 3 (November 1965)

APIRION, D. The two-way selection of mutants and revertants in respect of acetate utilization and resistance to fluoroacetate in <i>Aspergillus nidulans</i>	page 317
BAILEY, D. W. and KOHN, H. I. Inherited histocompatibility changes in progeny of irradiated and unirradiated inbred mice	330
WILSON, S. P., KYLE, W. H. and BELL, A. E. The effects of mating systems and selection on pupa weight in <i>Tribolium</i>	341
MCCULLY, K. S. and FORBES, E. The use of <i>p</i> -fluorophenylalanine with 'master strains' of <i>Aspergillus nidulans</i> for assigning genes to linkage groups	352
LATTER, B. D. H. Quantitative genetic analysis in <i>Phalaris tuberosa</i> . I. The statistical theory of open-pollinated progenies	360
LATTER, B. D. H. Quantitative genetic analysis in <i>Phalaris tuberosa</i> . II. Assortative mating and maternal effects in the inheritance of date of ear emergence, seed weight and seedling growth rate	371
HESTON, W. E., HOFFMAN, H. A. and RECHCIGL, M., JR. Genetic analysis of liver catalase activity in two substrains of C57BL mice	387
GIBSON, I. The replication of metagons and mu particles from <i>Paramecium</i> in another cell— <i>Didinium</i>	398
YEUNG, K. K. Maintenance of kappa particles in cells recently deprived of gene K (stock 51, syngen 4) of <i>Paramecium aurelia</i>	411
PATEMAN, J. A. and FINCHAM, J. R. S. Complementation and enzyme studies of revertants induced in an <i>am</i> mutant of <i>N. crassa</i>	419
CLARKE, C. H. Mutagen specificity among reversions of ultraviolet-induced <i>adenine-1</i> mutants of <i>Schizosaccharomyces pombe</i>	433
STOUTHAMER, A. H., DE HAAN, P. G. and NIJKAMP, H. J. J. Mapping of purine markers in <i>Escherichia coli</i> K12	442
KRISCH, R. Effects on genetic recombination of <i>Escherichia coli</i> K12 produced by P ³² decay in the Hfr male	454
Low, B. Low recombination frequency for markers very near the origin in conjugation in <i>E. coli</i>	469
RITCHIE, D. A. Mutagenesis with light and proflavine in phage T4. II. Properties of the mutants	474
HOLLOM, S. and PRITCHARD, R. H. Effect of inhibition of DNA synthesis on making in <i>Escherichia coli</i> K12	479
<i>Index of subjects and authors</i>	485

Starting with Volume 7 in 1966, Genetical Research will be increased in extent and published in two volumes each of three parts yearly. The subscription price will be £5 (USA. \$18.50) a volume including postage. Single parts will be £2 (USA. \$7.50) postage extra.

PLATES should only be included where absolutely essential. They should be supplied as unmounted glossy prints; any lettering to be inserted on them is best indicated on a separate sketch. Please do not damage prints by writing heavily on their backs or by using paper clips.

DIAGRAMS should be about twice the size of the finished block, and the thickness of lines and size of points determined accordingly. They must be drawn in Indian ink on white Bristol Board or tracing linen; graph paper ruled in pale blue (but not other colours) is also acceptable. Lettering should be lightly inserted in soft pencil only, so that the printer can put in the finished lettering.

Legends to illustrations must be given on a separate sheet of paper. Each illustration must have the name of the author and figure number pencilled on the back. Plates and diagrams should be numbered separately and their position indicated on the typescript. It will hasten refereeing if a photograph of each diagram can be supplied with the carbon copy of the paper.

TABLES should each be typed on a separate sheet of paper and their approximate positions in the text indicated on the typescript. Each table should be numbered and carry an appropriate title. The table should be designed, whenever possible, to be printed in the normal orientation of the text. The data should be grouped so as to make the use of rules unnecessary. Vertical rules, in particular, are expensive to print, and will only be included at the Editor's discretion.

FOOTNOTES should be avoided where possible. They can often be incorporated into the text, in parentheses.

SYMBOLS. Italic letters should generally be adopted for both gene symbols and quantities in mathematical formulae. Bold letters add to printing costs, and should only be used where they are necessary to avoid confusion.

SPELLING should follow the *Concise Oxford Dictionary*.

REFERENCES should follow the normal usage in the journal. In the list of references at the end of the paper, titles of periodicals should be abbreviated according to the *World List of Scientific Periodicals* (fourth edition).

PROOFS. Two sets of single-sided page proofs, together with the typescript, of each paper will be sent to the author. The printers' marked proof should be returned after correction to the Executive Editor. Excessive alterations, other than corrections of printers' errors, may be disallowed or charged to the author. Correction should be made using the symbols in British Standard 1219: 1958, or its shortened version B.S. 1219C: 1958.

Proofs of short notes will only be sent to authors if time permits.

OFFPRINTS. Fifty offprints of each paper, including short notes, are provided free of charge. Additional offprints may be ordered on the form sent out with proofs, provided this is returned within seven days of receipt.
