Research Papers

Attack rates of Sporobolus virginicus and patterns of pine tree defenses and mortality in northern Patagonia 141

Characterization of three heat shock protein 70 genes from Drosophila hydei and expression during thermal stress and insect development 150

G. Barloggio, L. Tamm, P. Nagel and H. Luka

Selective Btovars to attract and enhance Helicoverpa armigera (Hemiptera: Noctuidae): a released biocontrol agent of Mamestra brassicae (Lepidoptera: Noctuidae) 160

M. Aluja, A. Birke, F. Díaz-Fleischer and J. Rull

Phenotypic plasticity in clutch size regulation among populations of a potential invasive fruit fly from Europe that vary in host heterotrophy and isolation 169

L. Goane, P.M. Pereyra, C. Castro, M.J. Ruiz, M.L. Juárez, D.F. Segura and M.T. Vera

Yeast derivatives and wheat germ in the adult diet modulates fecundity in a tephritid pest 178

I. Ishikawa and M. Iwasa

Effects of epinastin on the survival, reproduction and feeding activity of the diaspone Moth, Ostrinia nubilalis, and rare species, Cephus cinctus and Mollusculus (Coleoptera: Scarabaeidae) 191

Corrigendum

I. Ishikawa and M. Iwasa

Effects of epinastin on the survival, reproduction and feeding activity of the diaspone Moth, Ostrinia nubilalis, and rare species, Cephus cinctus and Mollusculus (Coleoptera: Scarabaeidae) – CORRIGENDUM 199

Research Papers

I. Kelnarova, E. Jendek, V.V. Grebennikov and L. Bocak

First molecular phylogeny of Agrilus (Coleoptera: Buprestidae), the largest genus on Earth, with DNA barcode database for forestry pest diagnostics 200

Z.-Z. Chen, L.-X. Xu, L.-J. Li, H.-R. Wu and Y.-X. Xu

Effects of constant and fluctuating temperature on the development of the oriental fruit moth, Grapholita molesta (Lepidoptera: Tortricidae) 212

X. Li, B. Li and L. Meng

Oviposition strategy for superparasitism in the gregarious parasitoid, Oomyzus sokolowskii (Hymenoptera: Eulophidae) 221

Molecular characterization of prophenoloxidase-1 (PPO1) and the inhibitory effect of kojic acid on phenoloxidase (PO) activity and on the development of Zeugodacus tau (Walker) (Diptera: Tephritidae) 236

Z. Li, M.J. Furlong, T. Yonow, D.J. Kriticos, H. Bao, F. Yin, Q. Lin, X. Feng and M.P. Zalucki

Management and population dynamics of diamondback moth (Plutella xylostella): planting regimes, crop hygiene, biological control and timing of interventions 257

S.F. Cui, L. Wang, L. Ma, Y.L. Wang, J.P. Qiu, Zh.Ch. Liu and X.Q. Geng

Comparative transcriptome analyses of adzuki bean weevil (Callosobruchus chinensis) response to hypoxia and hypoxia/respiration 266

I. Ishikawa and M. Iwasa

Effects of epinastin on the survival, reproduction and feeding activity of the diaspone Moth, Ostrinia nubilalis, and rare species, Cephus cinctus and Mollusculus (Coleoptera: Scarabaeidae) 191

Corrigendum

I. Ishikawa and M. Iwasa

Effects of epinastin on the survival, reproduction and feeding activity of the diaspone Moth, Ostrinia nubilalis, and rare species, Cephus cinctus and Mollusculus (Coleoptera: Scarabaeidae) – CORRIGENDUM 199
Aims and Scope

Established in 1950, the internationally recognised Bulletin of Entomological Research aims to further global knowledge of entomology through the generalisation of research findings rather than providing more entomological exceptions. The Bulletin publishes high-quality original research papers, ‘episites’ and review articles concerning insects or other arthropods of economic importance in agriculture, forestry, forestry products, biological control, medicine, animal health and natural resource management. The scope of papers addresses the biology, ecology, behaviour and systematics of individuals, populations, with a particular emphasis upon the major current and emerging pests of agriculture, horticulture and forestry, and vectors of human and animal diseases. This includes the interactions between species (plants, hosts for parasites, natural enemies and whole communities), novel methodological developments, including molecular biology, in an applied context. The Bulletin does not publish the results of pesticide testing or traditional taxonomic revisions.

Bulletin of Entomological Research is published bimonthly by Cambridge University Press

Editor-in-Chief
Dr Paul De Barro

Dr X.-Y. Hong, Department of Plant Protection, Nanjing Agricultural University, China
Dr S. Yang, Research Institute for Sustainable Humanosphere (RISH), Japan
Dr M. Yasuda, University of Adelaide, Australia
Professor W. Zhang, Sun Yat-sen University, China

Stylist of Paper
Bulletin of Entomological Research publishes two types of paper:

- Full length papers
- Reviews

All papers should be submitted in electronic form.

Full length papers

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.

We also welcome ‘Letters to the Editor’ with comments on recently published papers.

Manuscript Preparation

Language

Manuscripts should be written in English and submitted in electronic form.

Abstract

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly differentiated between primary (bold, large font size), secondary (bold, text size) and tertiary (italics) headings
- Acknowledgments (if any)
- Literature references
- Tables (as separate files)

Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References

References must be listed in alphabetical order (author, by year sequence and alphabetically within each year). Please list papers by more than two authors, but with the same first author.

Illustrations

Each figure should be submitted as a separate file in TIF or EPS format at 300dpi. Comprehensive guidance on creating suitable electronic figures is available at http://dx.sheridan.com/guidelines/digital.

Copyright

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

Notes for Authors

Please see the complete version ('Notes for Contributors') at journals.cambridge.org/ber

Aims, Scope and mission:

This issue has been published on FSC®-certified paper and cover board. FSC® is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Research Papers

Attack rates of Sirex noctilio and patterns of pine tree defenses and mortality in northern Patagonia 141

Characterization of three heat shock protein 70 genes from Liriomyza trifolii and expression during thermal stress and insect development 150

G. Barloggio, L. Tamm, P. Nagel and H. Luka
Selective flowers to attract and enhance Telenomus laeviceps (Hymenoptera: Scelionidae): a released biocontrol agent of Mamestra brassicae (Lepidoptera: Noctuidae) 160

M. Aluja, A. Birke, F. Díaz-Fleischer and J. Rull
Phenotypic plasticity in clutch size regulation among populations of a potential invasive fruit fly from environments that vary in host heterogeneity and isolation 169

L. Goane, P.M. Pereyra, F. Castro, M.J. Ruiz, M.L. Juárez, D.F. Segura and M.T. Vera
Yeast derivatives and wheat germ in the adult diet modulates fecundity in a tephritid pest 178

I. Ishikawa and M. Iwasa
Effects of eprinomectin on the survival, reproduction and feeding activity of the dung beetles, Onthophagus lenzii Harold, and rare species, Copris ochus Motschulsky (Coleoptera: Scarabaeidae) 191

Corrigendum

I. Ishikawa and M. Iwasa
Effects of eprinomectin on the survival, reproduction and feeding activity of the dung beetles, Onthophagus lenzii Harold, and rare species, Copris ochus Motschulsky (Coleoptera: Scarabaeidae) — CORRIGENDUM 199

Research Papers

I. Kelnarova, E. Jendek, V.V. Grebennikov and L. Bocak
First molecular phylogeny of Agrilus (Coleoptera: Buprestidae), the largest genus on Earth, with DNA barcode database for forestry pest diagnostics 200

Z.-Z. Chen, L.-X. Xu, L.-L. Li, H.-B. Wu and Y.-Y. Xu
Effects of constant and fluctuating temperature on the development of the oriental fruit moth, Grapholita molesta (Lepidoptera: Tortricidae) 212

X. Li, B. Li and L. Meng
Oviposition strategy for superparasitism in the gregarious parasitoid Oomyzus sokolowskii (Hymenoptera: Eulophidae) 221

P. Deroulers and V. Bretagnolle
The consumption pattern of 28 species of carabid beetles (Carabidae) to a weed seed, Viola arvensis 229

Molecular characterization of prophenoloxidase-1 (PPO1) and the inhibitory effect of kojic acid on phenoloxidase (PO) activity and on the development of Zeugodacus tau (Walker) (Diptera: Tephritidae) 236

E. Meng, J. Li, B. Tang, Y. Hu, T. Qiao, Y. Hou, Y. Lin, J. Li and Z. Chen
Alteration of the phagocytosis and antimicrobial defense of Octodonta nipae (Coleoptera: Chrysomelidae) pupae to Escherichia coli following parasitism by Tetrastichus brontispae (Hymenoptera: Eulophidae) 248
Z. Li, M.J. Furlong, T. Yonow, D.J. Kriticos, H. Bao, F. Yin, Q. Lin, X. Feng and M.P. Zalucki
Management and population dynamics of diamondback moth (Plutella xylostella): planting regimes, crop hygiene, biological control and timing of interventions 257

S.F. Cui, L. Wang, L. Ma, Y.L. Wang, J.P. Qiu, Zh.Ch. Liu and X.Q. Geng
Comparative transcriptome analyses of adzuki bean weevil (Callosobruchus chinensis) response to hypoxia and hypoxia/hypercapnia 266
