Editor-in-Chief

Robert Koebner, CropGen International, UK

Plant Genetic Resources is an international journal that brings together the many diverse topics concerned with plant genetic resources. Each issue gives you access to peer-reviewed research papers on genetic variation in plants, both crop and non-crop, as well as on the technical, socio-economic, legal and geo-political aspects of PGR. Many papers feature research directed to endangered non-crop and medicinal plants. The journal is of interest to researchers and scientists involved in the plant genetic resources community, including: breeders, all those with an interest in germplasm, policy makers, consultants and research students.

Senior Editor

David J. Middleton, Royal Botanic Garden, Edinburgh, UK

Edinburgh Journal of Botany is an international journal of plant systematics and related aspects of biodiversity, conservation and phytogeography. It covers plants and fungi in all geographic areas. Papers linking traditional and modern taxonomic techniques are especially encouraged. Commissioned book reviews and review articles are also included.
