Aims and Scope

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health. The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related information, implementation of programs and interventions, and sustainability of dietary patterns, food systems and supplies. We welcome papers that:

- Address assessment, monitoring, and surveillance of nutritional status or the quality of nutritional environments
- Describe the development and evaluation of methodology for assessment, monitoring, and surveillance in population-based samples
- Identify and analyse behavioural, social, cultural, environmental, economic, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes
- Build intelligence about the development, implementation, and evaluation of interventions and community nutrition programs and efforts
- Describe, discuss, debate and influence nutrition-related public policies
- Serve to build capacity for effective public health nutrition action, including workforce development and educational issues
- Develop perspectives and models for study diet and nutrition as related to the environment and sustainability.

We prefer papers that are innovative and contribute new knowledge to the literature. Papers should be succinct (i.e., usually well under 5000 words not including the abstract, references, tables, figures and acknowledgements). Short communications (<2000 words) are also welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at journals.cambridge.org/phn

Editor-in-Chief
Dr. Allison Hodge, Cancer Epidemiology Division, Cancer Council Victoria, Australia and Centre for Epidemiology and Biostatistics, University of Melbourne, Australia

Deputy Editors
Dr. Kaleb Baye, Addis Ababa University, Ethiopia
Dr. Mona Calvo, Ichan School of Medicine at Mount Sinai, USA

Prof. Mieke Faber, South African Medical Research Council, South Africa
Dr. William Johnson, Loughborough University, UK
Dr. Ciara Leo, University of California, USA
Dr. Stefanie Vandevijvere, Scientific Institute of Public Health, Belgium

Dr. Christina Vogel, University of Southampton, UK
Editors for Systematic Reviews and Meta-analyses
Dr. Amin Salchi-Abargouei, Sahib Sadooghi University of Medical Sciences, Iran

Statistical Editors
Dr. Flavia Barbosa, Nutrition Institute, Brazil Dr. Vasileikí Bouzina-Zouka, Institute of Child Health, UCL, UK

Dr. Eva Maria Navarrete Munoz, Miguel Hernández University, Spain

Associate Editors
Dr. Geeta Appannah, Universiti Putra Malaysia, Malaysia
Dr. Marina Araujo, Osvaldo Cruz Foundation, Brazil Prof. Xavier Baquer Vallés, Universidad Miguel Hernández, Spain

Ass. Prof. Vasileikí Benou, National and Kapodistrian University of Athens, Greece

Dr. Flavia Bezerra, Rio de Janeiro State University, Brazil

Dr. Miranda Blake, Deakin University, Australia
Dr. Sonia Blaney, Université de Montréal, Canada

International Editorial Board

Dr. Tara Boelen-Robinson, Deakin University, Australia
Dr. Jennifer Browne, Deakin University, Australia
