Talking to Children

Language Input and Acquisition

**Edited by CATHERINE E. SNOW and
CHARLES A. FERGUSON**

This volume looks at a topic of particular current interest in the field of Child Language – the speech used by parents to their children – and presents some of the best of recent work on the subject.

‘...this is a most welcome collection of papers in a rapidly developing field and they provide much useful and thought-provoking material...’
The Journal of Child Language

‘This book pulls together a great deal of information from an impressive array of experts and is the best single reference, that I know of, on the topic.’
Patricia Broen in *Asha*

Mother tongue to English

The young child in the multicultural school

DAPHNE M. BROWN

This book aims to make teachers and all involved in the education of young children aware of the special language needs of those who come from ethnic minority groups, and to give positive and practical help in meeting these needs. The author pays particular attention to the needs of children whose mother tongue is not English (their parents may be recent immigrants or they may simply come from homes in which English is not spoken). These needs and the resulting difficulties are sometimes greatest when the children are in a small minority.

Mother tongue to English will make an important contribution in one of education’s major problem areas – one that has until recently been little understood and therefore tended to be neglected.

LANGUAGE IN INFANCY AND CHILDHOOD

A LINGUISTIC INTRODUCTION TO LANGUAGE ACQUISITION

Alan Cruttenden This book surveys the development of language between birth and the age of five, and outlines the language development (including reading and writing) which is still taking place in the early school years. There is an emphasis throughout on the detailed order of acquisition in phonology, grammar and lexis. Written more from the viewpoint of linguistics than of psychology, the book is intended for all students of linguistics and child language, and also for those concerned with language teaching or language remediation. It is concerned not with how to teach, but with enabling teachers and therapists to formulate their own method, based on a greater knowledge of the facts of language acquisition.

The book is extensively referenced for the benefit of those readers who wish to study a particular topic in more depth, and a glossary of terms is provided. *cloth £6.95, paper £3.40*

Working with LARSP

David Crystal

Studies in Language Disability and Remediation 1A
General Editors: David Crystal and Jean Cooper

Volume 1 in this series, *The Grammatical Analysis of Language Disability*, sets out a new procedure for treatment of grammatical disability – the Language Assessment, Remediation and Screening Procedure. LARSP is now widely used in clinical and educational institutions in the UK and elsewhere. The authors have also given many in-service courses to clinicians and teachers. The purpose of this new book is to give detailed help with practical problems of using this remedial procedure – sampling, transcription, grammatical analysis, profiling, profile interpretation and the devising of remedial procedures. In addition, the book contains case studies and brief contributions on the use of the programme in major centres.

Contents

Introduction.

Part I The LARSP procedure

Sampling. Transcription. Analysis and profiling. Developmental stages. Interpretation. Remediation.

Part II LARSP in clinical settings

Dawn House School – Corinne Haynes. John Horniman School – Ella Hutt. The Nuffield Hearing and Speech Centre – Elspeth Paul. The Audiology Unit, Reading: a pre-school group – Mary Auckland. A partially-hearing unit – J E Williams and D B Dennis.

Part III LARSP in research and teaching

A grammatical analysis of the speech of partially-hearing children – John Bench and John M Bamford. Sentence-repetition tasks compared with expressive language performance – Julie Brinton. Some remarks on the teaching of LARSP – J H Connolly.

Part IV – Workbook section

NOTES FOR CONTRIBUTORS

Papers, notes and reviews should be sent to Prof. D. Crystal, Department of Linguistic Science, University of Reading, Whiteknights, Reading, Berkshire, England. They should normally be written in English. Major articles should not exceed twenty printed pages.

Three copies of the typescript should be submitted, one of which should be the top copy. Contributions should be clearly typed with double spacing, on one side of the paper only, using a conventional size of paper, preferably A4 (or 21.6 by 28 cm). Authors should hold one copy for correction of proofs. Footnotes, which should be as few as possible, should be listed, double spaced, on a separate sheet at the end of the article. Line diagrams, which should also be kept to a minimum, may be left in the text, but should be numbered independently of examples or utterances, etc. The title-page should include the title, author's name and affiliation, together with the address to which proofs are to be sent. Titles should be so worded that the first part may be used as a running headline (with a maximum length of 50 characters, including spaces). An abstract of the article (max. 120 words) should be typed on a separate sheet. Chronological age should be stated in years, months and (where needed) days as follows: 4;5.17.

Cited forms should be underlined to represent italicization in print. Translational 'meanings' should be placed within single quotation marks. Emphasis should be marked by the use of small capitals. Phonetic transcriptions should, wherever possible, employ the symbols and conventions of the IPA; they must never be used in footnotes, and should in no case be narrower than absolutely necessary for the purpose.

References are to be made in the text thus: (Neisser 1967: 222). If the author's name is part of the text, the following form should be used: 'Piaget (1967: 131) in-

vestigates...'. When a work written by three or more authors is referred to, all names should be given in the first citation, with an ampersand linking the last two; e.g. (Fraser, Bellugi & Brown 1963): in subsequent citations the first name only should be given, with 'et al.' added.

All works referred to should be listed at the end of the article, double-spaced and in alphabetical order. The titles of articles should as far as possible be abbreviated according to the conventions of the Linguistic Bibliography of the Permanent International Committee of Linguists (CIPL). Examples of references (note the use of punctuation marks within references): Carroll, J. B. (1961). Language development in children. In S. Saporta (ed.), *Psycholinguistics: a book of readings*. New York: Holt, Rinehart & Winston.

Lenneberg, E. H. (1967). *Biological foundations of language*. New York: Wiley.

Oldfield, R. C. & Marshall, J. C. (eds) (1968). *Language*. Harmondsworth: Penguin.

Velten, H. V. (1943). The growth of phonemic and lexical patterns in infant language. *Lg* 19. 281-92.

Drawings, graphs, tables and figures should be done to professional standards in Indian ink on heavy unruled paper, or on graph paper ruled in light blue. Lettering on graphs, etc., is to be indicated in blue pencil or (preferably) on an overlying sheet of tracing paper.

With the exception of the title-page, book reviews should be submitted in the same form as articles. The title-page should be of the following form:

F. Smith & G. A. Miller (eds), *The genesis of language*. Cambridge, Mass.: MIT Press, 1966. Pp. xii + 400.
