Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health.

The scope of Public Health Nutrition includes food systems and supplies, patterns of diet, foods and drinks, nutrients, body composition, physical activity, and associated factors, and their effects on disease, health and well-being, and the whole living and physical world. We welcome papers that:

- Address nutritional status assessment, monitoring, and surveillance
- Identify and analyse social, cultural, biological, environmental, economic and political determinants of nutrition-related public health
- Build intelligence about the development and evaluation of environmental and settings-based interventions focused on the availability of foods including interventions in the out of home eating environment.

Aims and Scope

- Describe, discuss, debate and influence food and nutrition policy
- Focus on improving food and nutrition-related public health, particularly in populations that are most vulnerable and at risk.
- Discuss and build capacity for effective public health nutrition action, including workforce development and educational issues
- Develop and test innovative and emerging models, methods and approaches to public health nutrition practice and research.

We prefer papers that are innovative and contribute new knowledge to the literature. Papers should be succinct (ie, usually well under 5,000 words not including the abstract, references, tables, figures and acknowledgements). Short communications are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at: journals.cambridge.org/phn

International Editorial Board

Prof. Hélène Delisle, University of Montreal, Canada
Dr Colleen Doak, VU University, Amsterdam
Associate Professor Eva-Charlotte Ekström, Uppsala University, Sweden
Professor Mieke Fuhse, Medical Research Council, South Africa
Dr. Jayne A. Fullerton, University of Minnesota
Dr Anouk Geelen, Wageningen University, The Netherlands
Professor Denise Gigante, Federal University of Pelotas, Brazil
Professor Ted Greiner, Hong Kong University, Republic of Korea
Dr Jennifer L. Harris, Yale University, USA
Dr Lisa Houghton, University of Otago, New Zealand
Dr Alexis Hure, University of Newcastle, Australia
Dr Bridget Kelly, University of Wollongong, Australia
Dr Colette Kelly, National University of Ireland, Northern Ireland
Dr Cécile Knai, London School of Hygiene & Tropical Medicine, University of London, UK
Professor Salome H Krugers, North-West University, Potchefstroom, South Africa
Professor Christel Lambregtse-Allardt, University of Helsinki, Finland
