

Finalists for the

## 2019 Microscopy Today Micrograph Awards

Competition finalists shown on the cover are identified below. The identity and affiliation of the submitters were not known to the judges. The larger number of Open category finalists reflects the larger number of entries in this category. Prizes will be awarded on August 7 at M&M 2019. Micrographs may be viewed uncropped at the 2019 gallery (see website at the bottom of this page). The public may vote for the People's Choice Award at the same website.

### Column 1 (Published category)

- C1-1 Stainless steel 316L by additive manufacturing (reflected light microscopy) by Gaby Ketzer-Raichle
- C1-2 Macromolecules in rat neuron harboring poly-GA aggregate (cryo-EM tomogram) by Qiang Guo
- C1-3 *Artemia franciscana* (brine shrimp) at 35 days of growth (light microscopy) by Timm Piper
- C1-4 Aortic smooth muscle cell from mouse with progeria (TEM of thin section) by Thomas Weston
- C1-5 Copepod with epibiotic microalgae living in symbiosis (LM focus stack) by Håkan Kvarnström

### Columns 2, 3, and 4 (Open category of unpublished micrographs)

- C2-1 Three species of desmids in fresh pond water (LM focus stack) by Michael Much
- C2-2 Fibroblast-like cell line (COS-7) from monkey kidney tissue (STED LM) by Daniela Malide
- C2-3 Disordered regions (orange) in two-polymer Li-battery electrolyte (SEM) by Alexander Mueller
- C2-4 Potassium ferricyanide anisotropic crystals (LM with polarizer) by Jörg Piper
- C2-5 Branched structure of precipitated creatine particle aggregates (DIC LM) by Karl Gaff
- C3-1 Paint layers from the Robert Carter house, Williamsburg, VA (UV LM) by Kirsten Moffitt
- C3-2 Gear of AlSi10Mg alloy by additive manufacturing (reflected LM) by Gaby Ketzer-Raichle
- C3-3 Rotifer *Polyarthra* sp. 150 µm long showing part of ovary (DIC LM focus stack) by Håkan Kvarnström
- C3-4 Desmid green alga *cosmarium* sp. 68 µm wide (polarized LM) by Håkan Kvarnström
- C3-5 Cross section of urban micrometeorite from Minneapolis roof (SEM BSE) by Anette von der Handt
- C4-1 Rhododendron pollen grains with emerging pollen tubes (green) (SEM) by Changbin Chen
- C4-2 Okra seeds with partial brown skin after air exposure (LM focus stack) by Changbin Chen
- C4-3 Mold (likely *Aspergillus* sp.) on a plum seed (LM focus stack) by Sergii Dymchenko
- C4-4 Wasp head (*Vespula* sp.) with autofluorescence of eyes (vis/UV LM focus stack) by Sergii Dymchenko
- C4-5 Carbon-free martensite in a CoFeSi alloy, color-etched (reflected LM) by Felix Trauter

### Column 5 (Video category)

- C5-1 Animation of 3D rendering of rat neuronal polyGA aggregate (cryo-EM tomogram) by Qiang Guo
- C5-2 Colonies of rotifers (*Conochilus hippocrepis*) rotating via beating cilia (DF LM) by Julia Van Etten
- C5-3 Simulation of drug release through polymer membrane structure (SEM) by Shawn Zhang
- C5-4 *Paramecium caudatum* fed with Congo red stained yeast (DIC LM) by Gerd Günther
- C5-5 *Oscillatoria* sp. cyanobacteria filaments filmed in time lapse (DIC LM) by Gerd Günther

**Vote for your favorite micrograph at the 2019

## Subscription Requests

### Free Subscriptions

Individuals requesting subscriptions, or wishing to change their address, should contact MTsubscriptions at:  
[AssociationManagement@microscopy.org](mailto:AssociationManagement@microscopy.org)

### Subscription Policies

- Microscopists in the United States are eligible for gratis mail subscriptions.
- Microscopists in Canada and Mexico may subscribe to the print edition for \$25US.
- Microscopists in the rest of the world may subscribe to the print edition for \$35US.
- Microscopists in outside the United States may request gratis email alerts to the digital edition.
- Microscopists anywhere in the world may view the digital edition at the *Microscopy Today* website shown at the bottom of this page.

### Digital Edition

- The digital edition is an exact replica of the print edition, advertisements and all.
- Features include dynamic pages with live webpage and email links, a word-level search function, and variable page magnification to enlarge both text and figures.

*Microscopy Today* has articles about:

- Innovative instruments and methods
- Applications in various fields
- Hints and tips for novices and experts
- Protocols in microscopy and microanalysis
- Microscopy facilities descriptions
- Meetings and courses
- Success stories in microscopy education
- Historical microscopy and pioneers
- Industry news and product news
- Humorous situations
- Opinions of our readers

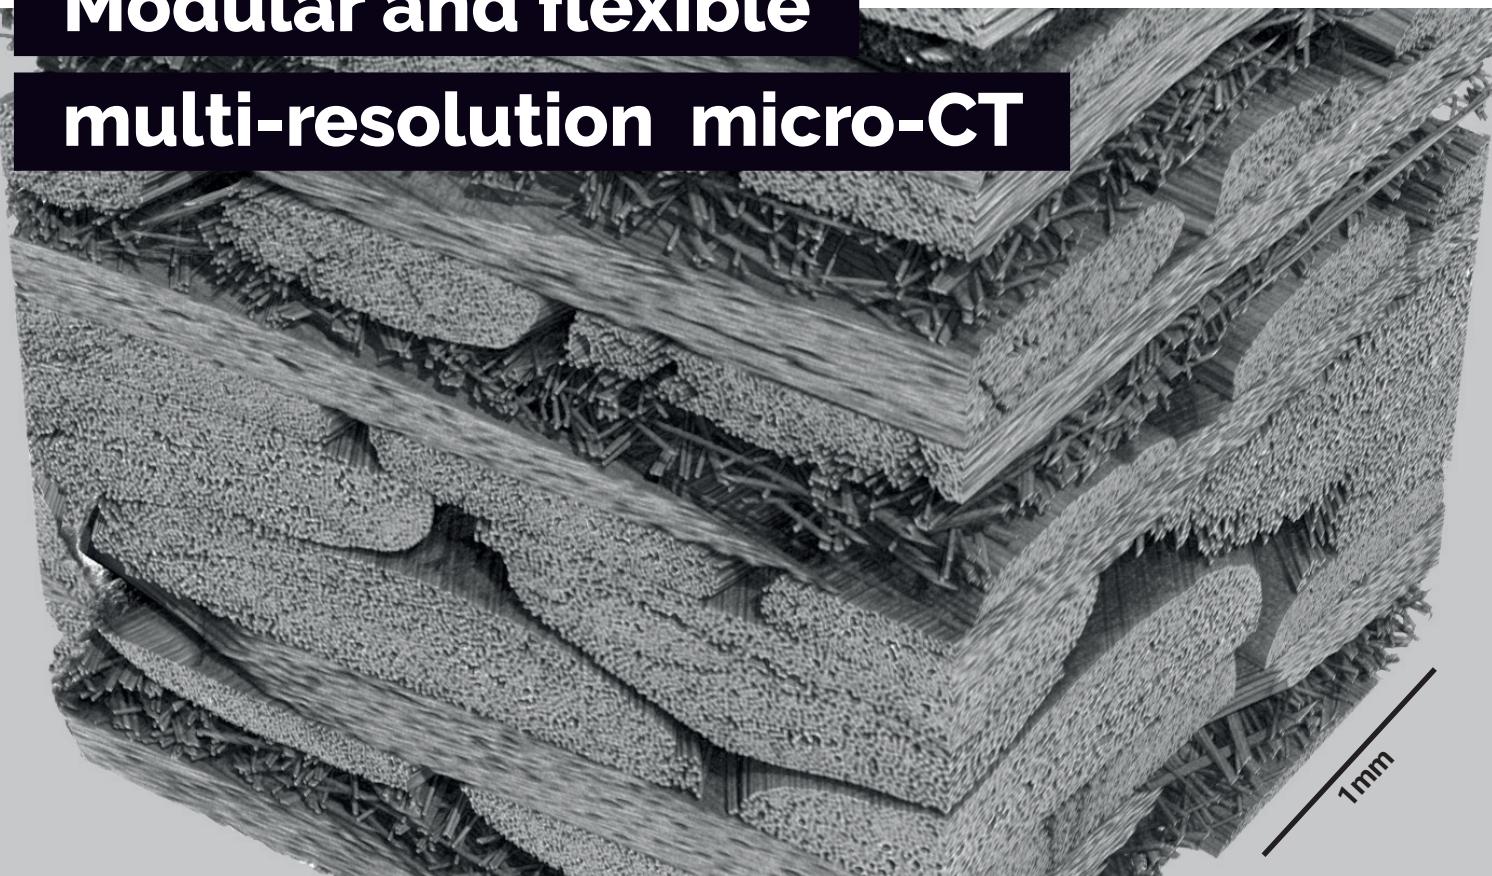

### Subscription Customer Service

To change your address or your subscription profile, call 703-234-4115 or send an email request to [associationmanagement@microscopy.org](mailto:associationmanagement@microscopy.org).

# Modular and flexible multi-resolution micro-CT

## TESCAN UniTOM XL

- ✓ High temporal and spatial resolution micro-CT
- ✓ Optimized for multi-scale imaging and high throughput
- ✓ Enabling dynamic *in situ* imaging

▲ Woven Composite Material  
► TESCAN UniTOM XL

70  
TH  
ANNIVERSARY

Solutions for Innovation

70 YEARS STRONG

The name JEOL has been synonymous with microscopy and microanalysis for 70 years. Today, we continue to evolve our SEM, TEM, and EPMA technologies through dedication to advancing science and the flow of ideas. JEOL's innovative solutions instill stability, performance, and productivity in all of our products. Thank you to our customers for being part of our history of leadership in this field and our vision for the future. We are proud to be a part of your important viewpoint and success!
