

## AUTHOR INDEX FOR VOLUME 102

ALANAZI, A. M., MUNAGI, A. O. and NYIRENDA, D.; Power partitions and semi- $m$ -Fibonacci partitions	418
ALLU, V., SOKÓŁ, J. and THOMAS, D. K.; On a close-to-convex analogue of certain starlike functions	268
ARORA, S.; Solution branches of nonlinear eigenvalue problems on restricted domains	490
BÉTERMIN, L.; On a lattice generalisation of the logarithm and a deformation of the Dedekind eta function	118
BREUER, F. and SHPARLINSKI, I. E.; Lower bounds for periods of Ducci sequences	31
BRITS, R.; see TOURÉ, C.	303
CADAVID, P.; see RAMOS, A. D.	517
CHEN, M.; Gradient estimates via two-point functions for parabolic equations under Ricci flow	319
CHEN, X. and LEWIS, M. L.; Degrees of Brauer characters and normal Sylow $p$ -subgroups	237
CHEN, X., YANG, J., GENG, X. and WANG, L.; Singularity of oriented graphs from several classes	7
CHERN, S. and TANG, D.; Vanishing coefficients in quotients of theta functions of modulus five	387
CONCEIÇÃO, R.; On integral points on isotrivial elliptic curves over function fields	177
COONS, M.; Degree-one Mahler functions: asymptotics, applications and speculations	399
DE GIOVANNI, F.; see ESPOSITO, D.	96
DING, Y.; see ZHOU, Y.	342
DRAGOMIR, S. S.; Inequalities of Jensen's type for positive linear functionals on Hermitian unital Banach $*$ -algebras	308
EBRAHIMI, M.; Character graphs with nonbipartite Hamiltonian complement	91
ELGENDI, S. G.; On the problem of non-Berwaldian Landsberg spaces	331
ESPOSITO, D., DE GIOVANNI, F. and TROMBETTI, M.; Groups whose nonnormal subgroups are metahamiltonian	96
FANG, J.; Deforming a starshaped curve into a circle by an area-preserving flow	498
FISH, S., KING, D. and MILLER, S. J.; Extensions of autocorrelation inequalities with applications to additive combinatorics	451
GAO, X. and WEN, S.; Note on Fourier–Stieltjes coefficients of coin-tossing measures	479
GENG, X.; see CHEN, X.	7
GONZÁLEZ, J.; see IPANAQUE ZAPATA, C. A.	506
GRICE, J. T.; Axiomatisability of the class of monolithic groups in a variety of nilpotent groups	67

GU, C.-Y. and GUO, V. J. W.; Proof of two conjectures on supercongruences involving central binomial coefficients	360
GUO, V. J. W.; see GU, C.-Y.	360
HAN, Y.; see ZHOU, Y.	342
HE, L., TANG, Y. and TU, Z.; $L^p$ regularity of the weighted Bergman projection on the Fock–Bargmann–Hartogs domain	282
HE, W.; see WANG, H.	439
HUANG, Z.-Y.; see LIU, J.-C.	353
ILYAS, M.; Finite-element methods and multi-field applications	174
INTEP, S.; see SRIPONPAEW, B.	261
IPANAQUE ZAPATA, C. A. and GONZÁLEZ, J.; Sequential collision-free optimal motion planning algorithms in punctured Euclidean spaces	506
JABALLAH, A. and JARBOUI, N.; From topologies of a set to subrings of its power set	15
JARBOUI, N.; see JABALLAH, A.	15
JI, Z.; Ancient solutions of codimension two surfaces with curvature pinching	162
KALAJ, D.; Quasiconformal harmonic mappings between domains containing infinity	109
KING, D.; see FISH, S.	451
KOVALEV, L. V. and YANG, X.; Algebraic structure of the range of a trigonometric polynomial	251
LE, P.; Stable solutions to the static Choquard equation	471
LEWIS, M. L.; see CHEN, X.	237
LI, L.; see WANG, W.	186
LIN, B. L. S.; Overpartitions related to the mock theta function $V_0(q)$	410
LIN, B. L. S., LIU, J., WANG, A. Y. Z. and XIAO, J.; Infinite families of congruences for overpartitions with restricted odd differences	59
LING, D. R. and TANG, M.; Some remarks on minimal asymptotic bases of order three	21
LIU, J.; see LIN, B. L. S.	59
LIU, J.-C. and HUANG, Z.-Y.; A truncated identity of Euler and related $q$ -congruences	353
LIU, Y.; On sums of two prime squares, four prime cubes and powers of two	207
LO, C.-O. and LOH, A. W.-K.; Compact weighted composition operators between $L^p$ -spaces	151
LOH, A. W.-K.; see LO, C.-O.	151
LONGSTAFF, W. E.; Irreducible families of complex matrices containing a rank-one matrix	226
MAO, R.; Arithmetic properties of coefficients of the mock theta function $B(q)$	50
MATSUI, R. and TAKAHASHI, Y.; Arens products, Arens regularity and related problems	138
MELLO, J.; On semigroup orbits of polynomials and multiplicative orders	365
MILLER, S. J.; see FISH, S.	451

MORALES-SILVA, D. M.; Assessing healthcare providers' performance with and without risk adjustment	172
MUNAGI, A. O.; see ALANAZI, A. M.	418
NICA, B.; A note on normalised heat diffusion for graphs	1
NOKHODKAR, A.-H.; Applications of systems of quadratic forms to generalised quadratic forms	374
NYIRENDA, D.; see ALANAZI, A. M.	418
PHOCHAI, T. and SAEJUNG, S.; Hyperstability of generalised linear functional equations in several variables	293
PINELIS, I.; Odd–even decomposition of functions	104
RAMOS, A. D., SOUSA, C. S., RODRIGUEZ, P. M. and CADAVID, P.; An improved lower bound for the critical parameter of Stavskaya's process	517
RANKIN, C.; Distinct solutions to generated Jacobian equations cannot intersect	462
RODRIGUEZ, P. M.; see RAMOS, A. D.	517
SAEJUNG, S.; see PHOCHAI, T.	293
SAEJUNG, S.; see SENASUKH, J.	126
SENASUKH, J. and SAEJUNG, S.; On the hyperstability of the Drygas functional equation on a restricted domain	126
SHPARLINSKI, I. E.; see BREUER, F.	31
SOKÓŁ, J.; see ALLU, V.	268
SONG, T. and ZHOU, Q.; On the longest block function in continued fractions	196
SOUSA, C. S.; see RAMOS, A. D.	517
SPIGA, P.; On a conjecture on the permutation characters of finite primitive groups	77
SRIPONPAEW, B. and INTEP, S.; The floor of the arithmetic mean of the cube roots of the first $n$ integers	261
SUN, Z.-H.; Transformation formulas for the number of representations of $n$ by linear combinations of four triangular numbers	39
SZOSTOK, T.; Inequalities for Dragomir's mappings via Stieltjes integrals	240
TAKAHASHI, Y.; see MATSUI, R.	138
TANG, D.; see CHERN, S.	387
TANG, M.; see LING, D. R.	21
TANG, Y.; see HE, L.	282
THOMAS, D. K.; see ALLU, V.	268
TOURÉ, C. and BRITS, R.; Multiplicative spectral functionals on $C(X)$	303
TROMBETTI, M.; see ESPOSITO, D.	96
TU, Z.; see HE, L.	282
WANG, A. Y. Z.; see LIN, B. L. S.	59
WANG, H., HE, W. and ZHANG, J.; On $(\beta, G_{\Pi})$ -unfavourable spaces	439
WANG, L.; see CHEN, X.	7
WANG, W. and LI, L.; Simultaneous dynamical Diophantine approximation in beta expansions	186

WEN, S.; see GAO, X.	479
XIAO, J.; see LIN, B. L. S.	59
YANG, J.; see CHEN, X.	7
YANG, X.; see KOVALEV, L. V.	251
ZENG, Y.; Finite groups with complemented 2-minimal $p$ -subgroups	430
ZHANG, J.; see WANG, H.	439
ZHOU, N. H.; Uniform asymptotic formulas for restricted bipartite partitions	217
ZHOU, Q.; see SONG, T.	196
ZHOU, Y., HAN, Y. and DING, Y.; On the $k$ -error linear complexity of sequences from function fields	342

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\LaTeX$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\LaTeX$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\TeX$  are able to produce PDF files directly. A  $\LaTeX$  class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at [editor@bulletin.austms.org.au](mailto:editor@bulletin.austms.org.au).

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2020 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

<b>A truncated identity of Euler and related <math>q</math>-congruences</b> <i>Liu, J.-C. &amp; Huang, Z.-Y.</i>	353
<b>Proof of two conjectures on supercongruences involving central binomial coefficients</b> <i>Gu, C.-Y. &amp; Guo, V. J. W.</i>	360
<b>On semigroup orbits of polynomials and multiplicative orders</b> <i>Mello, J.</i>	365
<b>Applications of systems of quadratic forms to generalised quadratic forms</b> <i>Nokhodkar, A.-H.</i>	374
<b>Vanishing coefficients in quotients of theta functions of modulus five</b> <i>Chern, S. &amp; Tang, D.</i>	387
<b>Degree-one Mahler functions: asymptotics, applications and speculations</b> <i>Coons, M.</i>	399
<b>Overpartitions related to the mock theta function <math>V_0(q)</math></b> <i>Lin, B. L. S.</i>	410
<b>Power partitions and semi-<math>m</math>-Fibonacci partitions</b> <i>Alanazi, A. M., Munagi, A. O. &amp; Nyirenda, D.</i>	418
<b>Finite groups with complemented 2-minimal <math>p</math>-subgroups</b> <i>Zeng, Y.</i>	430
<b>On <math>(\beta, G_{\Pi})</math>-unfavourable spaces</b> <i>Wang, H., He, W. &amp; Zhang, J.</i>	439
<b>Extensions of autocorrelation inequalities with applications to additive combinatorics</b> <i>Fish, S., King, D. &amp; Miller, S. J.</i>	451
<b>Distinct solutions to generated Jacobian equations cannot intersect</b> <i>Rankin, C.</i>	462
<b>Stable solutions to the static Choquard equation</b> <i>Le, P.</i>	471
<b>Note on Fourier–Stieltjes coefficients of coin-tossing measures</b> <i>Gao, X. &amp; Wen, S.</i>	479
<b>Solution branches of nonlinear eigenvalue problems on restricted domains</b> <i>Arora, S.</i>	490
<b>Deforming a starshaped curve into a circle by an area-preserving flow</b> <i>Fang, J.</i>	498
<b>Sequential collision-free optimal motion planning algorithms in punctured Euclidean spaces</b> <i>Ipanaque Zapata, C. A. &amp; González, J.</i>	506
<b>An improved lower bound for the critical parameter of Stavskaya’s process</b> <i>Ramos, A. D., Sousa, C. S., Rodriguez, P. M. &amp; Cadavid, P.</i>	517
<b>Author Index for Volume 102</b>	525
