# PARASITES, PESTS AND PREDATORS

WORLD ANIMAL SCIENCE  
Volume B2

edited by **S.M. GAAFAR**, *School of Veterinary Medicine, Purdue University, West Lafayette, IN*,  
**W.E. HOWARD** and **R.E. MARSH**,  
*Wildlife and Fisheries Biology, University of California, Davis, CA, U.S.A.*

This volume encompasses two specialized fields. The first section is concerned with parasitology, the second with vertebrates as pests. Parasitology in livestock production is an important and relatively complex subject. The various chapters in this section cover most of the general aspects of host-parasite relations as well as some of the most prominent and economically important parasitic diseases throughout the world.

## CONTENTS

### Part I. Invertebrates.

1. Introduction (*S.M. Gaafar*).
2. Effects of parasites on animal and meat production (*H.C. Gibbs*).
3. Means of dissemination of parasites (*J.H. Greve*).

4. Control of parasites by chemotherapy (*L.P. Conway*).
5. Genetic control of parasites (*R.F. Riek*).
6. Biological control of parasites (*R.E. Williams*).
7. Parasiticides and the environment (*R.L. Rudd*).
8. Public health significance of animal parasites (*D.E. Jacobs*).
9. Intestinal protozoa (*J.P. Dubey*).
10. Blood protozoa (*R.E. Purnell*).
11. Flukes of domestic animals (*J.C. Borey*).
12. Tapeworms (*J.F. William, T.W. Schillhorn van Veen*).
13. Trichostrongylosis in ruminants (*G.W. Benz*).
14. Ascariidosis of domestic animals (*R.M. Connan*).
15. Equine strongylosis (*J.H. Drudge*).
16. Lungworms of ruminants (*G.M. Urquhart*).
17. Flies and myiasis (*W.N. Beesley*).
18. Mange mites and other parasitic mites (*W.P. Meleney*).
19. Ticks (*H. Hoogstraal*).
20. Importance of immunology in relation to parasitism, and animal production (*P. Nansen*).

### Part II. Vertebrates.

21. Introduction (*W.E. Howard*).
22. Predators of Southern Africa (*D. Hey*).
23. Asian predators of livestock (*I. Prakash*).
24. Australian predators of livestock (*B.J. Coman*).
25. Large mammal and bird predators of livestock in North America (*D.A. Wade*).
26. Reptilian and small mammalian predators of livestock in America (*W.D. Fitzwater*).
27. Wild ungulates as competitors of livestock (*W.G. Swank*).
28. European rabbit and hare as pests of livestock (*M.E.R. Godfrey*).
29. Competition of rodents and other small mammals with livestock in the United States (*R.E. Marsh*).
30. Livestock diseases caused by wild mammals (*M.E. Fowler*).
31. Effects of vampire bats and paralytic rabies of livestock production (*A.M. Greenhall*).

1985 xvi + 576 pp.  
Price: US \$ 139.00 / Dfl. 375.00  
ISBN 0-444-42175-0

# CAMBRIDGE EXTENDS YOUR BIOLOGICAL KNOWLEDGE!

## The Cambridge Encyclopedia of Life Sciences

Edited by **ADRIAN FRIDAY**  
and **DAVID S. INGRAM**

This carefully planned encyclopedia encapsulates the entire world of nature. It delves deep into the microscopic world of cells and simple organisms, and then, in the light of recent research, it explores the animals, plants and environments with which we are more familiar. The final chapters discuss the current debates on evolution and the origin of the human species.

*The Cambridge Encyclopedia of Life Sciences* will prove invaluable to you as a reference book. **£25.00 net**

### CONTENTS

Contributors: Foreword *J. E. Treherne*:  
Introduction: **Part One Processes and  
organisation**: The Cell: The Organism:  
Genetics: Behaviour and Sociobiology:  
Ecology: **Part Two Environments**:  
Biogeographical Zones: Marine  
Environments: Coastal Environments:  
Terrestrial Environments: Freshwater and  
Wetland Environments: Living Organisms  
as Environments: **Part Three Evolution**

- ★ lavishly illustrated with specially prepared diagrams and drawings and a superb selection of colourful photographs
- ★ classification scheme for living organisms
- ★ lists for further reading
- ★ many learned contributors

**and the fossil record**: The Evolutionary Process: Palaeontology: Early Events in Evolution: Origin and Development of the Land Flora and Fauna: Recent History of the Fauna and Flora: A Classification of Living Organisms: Acknowledgements: Species index: Subject index.

*Available from all good booksellers*
