PUBLIC HEALTH NUTRITION, VOLUME 23 - NUMBER 2

Nutritional epidemiology

Economic and environment
Understanding price incentives to upscale combination meals at large US fast-food restaurants
Molly A Iacovascu, Mohammad M Fisher, Alyssa J Meanan, Cameron G Devi, Asis K Mehta, Arvinder S Walia and Sava S Wegin

Community nutrition
Food industry predictions and associations with physical and emergent dietary intake in pre-schoolers: results from the Training-to-Health Project
Gordon Raben, Giuseppe Battaglia, Marcella Alves, Amanda Park, Rebecca Palmer and Melanie Badreldine

Interventions
Removing competitive foods v. nudging and marketing school meals: a pilot study in high-school cafeterias
Rebecca Monin, Margaret Reed, Katherine P Henderson and Melanie R Schwartz

Public policies
Attitudes and perceptions among urban South Africans towards sugar-sweetened beverages and taxation
Edwin W Blackmore, Michelle Shapley, Gustavo Monaco, Anka Appetich, Karen Neffson and Sharon A Norris

Eating patterns and lifestyles

Nutritional epidemiology

Stratification of BMI categories among older adults within and across countries
Carmon Do Ny

Cross-sectional association between diet quality and cardiometabolic risk by education level in Mexican adults
Angela Lopez-Gonzalez, Barry M Popkin, Penny Gordon-Larsen and Lindsay Smith Tavle

Effect of ‘Year’ pattern on blood pressure by gender and obesity, using the community-based KelKu cohort
Non-Nian, Dongmei Dong and Gang-Bo Lu

Maternal diet during lactation and infant feeding practices have synergistic association with child diet at 6 years
Sophia P Botelho, Emily Smith and Alison R Ward

Sugar-sweetened beverage consumption among Indigenous Australian children aged 5–3 years and association with socio-demographics, life circumstances and health factors
Katherine A Norris, Alana Long, Michelle Salome, Andrew J Houston and Raymond Levet

Maternal and child factors associated with child body fatness in a Canadian cohort
Sika M Kunturci, Harriet Okosina, Mary-Aleen, Selia M Armour, Maka E Edey, Rebecca R Young, Neblea I Bastel, Heddi M Tannock, Katrina M Galo and Kathryn E Dewey

Association between dietary patterns and overweight risk among Malaysian adults: evidence from nationally representative surveys
Sanghita Deyette, G. Linne Khoo, Rashidah Akbar, Rashidah Rehaut, Mohd. Hashim, Shapere-Anne, Neo-Ley Chu and Taih Ari

Diet quality, change in diet quality and risk of incident CVD and diabetes
The K, Lyn M Griffith, Elizabeth Serio and Casey R Reddy

A comparison of the modelled impacts on CVD mortality of attaining of public health recommendations was achieved in metropolitan and rural Australia
Leslie Oblote, Janice Jochet, Shreya Alemdar and Melanie Nickola

Nutritional epidemiology

Latent profile analysis of dietary intake in a community-dwelling sample of older Americans
Nicole J McGrath, Kaylee L Zungia and Christine M Kanner
Public Health Nutrition

Volume 23, 2020 ISSN: 1368-9800
Eighteen issues per year

Aims and Scope

- Build intelligence about the development, implementation, and evaluation of intersectoral and community nutrition programs and policies.
- Describe, discuss, debate and influence nutrition-related public policies.
- Provide a platform for early career development and foster the expansion of capacity development.
- Discuss the development and evaluation of methodology for assessment, monitoring, and surveillance in population-based samples.
- Identify and analyse social, behavioural, environmental, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

Notes for Authors

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for current issues and debates on critical nutrition issues. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Disclosure of financial support and any competing interests. The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution acknowledged to the author. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:
1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. Abstract should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concise, feasible, and potentially effective. Editors reserve the right to make changes to these sections as deemed appropriate.
4. References (sources of funding, competing interest declarations, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. References should be in Vancouver style. Please refer to the full Publication Manual of the Chicago Manual of Style for details.
6. Tables should be reduced to the simplest form and should not be used where text or figure give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published as an appendix to another publication.
7. Figures should be numbered, and legends should be provided. Each figure with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.
8. Proofreading: Correspondence and proofs for correction will be emailed to the first named author unless otherwise requested. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.
9. Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available for purchase and must be ordered before publication.
