Public Health Nutrition

Volume 23, Issue 2020, ISSN: 1368-9900
Eighteen years per issue

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of original papers, reviews and comments, and for discussions in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health.

The scope of Public Health Nutrition encompasses nutrition and nutrition policy at a population level, including work on assessment of nutritional status and nutritional environments, communication of nutrition-related information, implementation of programs and interventions, and sustainability of dietary patterns, food systems and supplies. We welcome papers that:

1. Address, monitor, and/or surveillance of nutritional status or the quality of nutritional environments.
2. Describe the development and evaluation of methodology for assessment, monitoring, and surveillance in population-based samples.
3. Identify and analyze behavioral, social, cultural, environmental, and political determinants of nutrition-related public health, and dietary and nutritional factors as determinants of health outcomes.

The Nutrition Society

The society has as its objective the advancement of the scientific study of nutrition and its application to the maintenance of human and animal health. Particulars of The Nutrition Society and application forms for membership are available from the Honorary Secretary.

The Nutrition Society, 10 Cambridge Court, 218 Sheepdip Road, London W6 7NJ, UK.
Telephone +44 (0)20 8724 5228. +44 (0)20 7602 1776.

Notes for Authors

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for current discussions of and debates on crucial health issues. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population and preventive approach. Papers that do not have this emphasis will not be accepted.

Content:

Original research findings and scientific reviews are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgment. Short communications (≤ 2000 words) are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to http://mc.manuscriptcentral.com/phnutr. Please contact the Editorial Office on phn.editorialoffice@cambridge.org regarding any other types of submission.

References: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to prepare complete and concise titles, names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the ‘Licence to Publish’ (in lieu of copyright transfer), available at https://www.nutrition society.org. It is the author’s responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (http://www.nutrition society.org.) Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers.

Disclosure of financial support and any competing interests: The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide the following information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. Title page should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.

2. Abstract should be structured, usually following the internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.

3. Text should be divided under headings (typically to include Introduction, Methods, Results, Discussion, Conclusions, References), and sub-headings as appropriate. Contributions that derive from the research and that are concise, feasible, and potentially effective, for example, editorials, may be invited or unsolicited.

4. Acknowledgements (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.

5. References should be in Vancouver style. Please refer to the current edition of the Vancouver guidelines.

6. Tables should be reduced to the simplest form and should not be used where entries give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text.

7. Figures should be numbered, and legends should be provided. Each figure, in legend with its text, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise notified. Authors will receive a PDF proof of checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original submission.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.
