

ON CONVERGENCE OF THE CONJUGATE FOURIER SERIES
OF A FUNCTION OF WIENER'S CLASS: CORRIGENDUM

RAFAT N. SIDDIQI

In the statement of the main theorem (top p.337) published by the author in Bull. Austral. Math. Soc. Vol. 39 (1989) pp.335–338, the phrase, “for which $\bar{f}(x)$ exists” should be replaced by “for which $f(x)$ is continuous and $\bar{f}(x)$ exists”.

To be precise, the main theorem (top p.337) should be read as follows:

THEOREM. *If $f \in V_p(1 < p < \infty)$, then the conjugate series (2) converges to $\bar{f}(x)$ at every $x \in [0, 2\pi]$, for which $f(x)$ is continuous and $\bar{f}(x)$ exists.*

Secondly, $\int_0^{\pi/n}(\psi_x)$ is misprinted as $\int_0^{\psi/n}(\psi_x)$ in 5th-last line on p.337.
