

## Amazing New Titles from Cambridge University Press!

**Forthcoming...****Second Edition****Data Analysis for  
Physical Scientists**

Featuring Excel®

Les Kirkup

\$75.00: Hb: 978-0-521-88372-6:  
500 pp.**Ergodic Control of  
Diffusion Processes**Ari Arapostathis,  
Vivek S. Borkar,  
Mrinal K. Ghosh*Encyclopedia of Mathematics  
and its Applications*\$115.00: Hb: 978-0-521-76840-5:  
335 pp.**Stochastic  
Processes**

Richard F. Bass

*Cambridge Series in Statistical  
and Probabilistic Mathematics*\$75.00: Hb: 978-1-107-00800-7:  
400 pp.**Greedy  
Approximation**

Vladimir Temlyakov

*Cambridge Monographs on  
Applied and Computational  
Mathematics*\$99.00: Hb: 978-1-107-00337-8:  
432 pp.**Structured****Regression for  
Categorical Data**

Gerhard Tutz

*Cambridge Series in Statistical  
and Probabilistic Mathematics*\$90.00: Hb: 978-1-107-00965-3:  
512 pp.**Financial Enterprise  
Risk Management**

Paul Sweeting

*International Series on  
Actuarial Science*\$99.00: Hb: 978-0-521-11164-5:  
564 pp.**Random Fields on  
the Sphere**Representation,  
Limit Theorems and  
Cosmological Applications  
Domenico Marinucci,  
Giovanni Peccati*London Mathematical Society  
Lecture Note Series*\$70.00: Pb: 978-0-521-17561-6:  
356 pp.**Principles of  
Applied Statistics**D. R. Cox,  
Christl A. Donnelly\$95.00: Hb: 978-1-107-01359-9  
\$39.99: Pb: 978-1-107-64445-8:  
212 pp.**Second Edition****Information Theory**Coding Theorems for  
Discrete Memoryless  
SystemsImre Csiszár,  
János Körner\$99.00: Hb: 978-0-521-19681-9:  
522 pp.**Principles of  
Multiscale Modeling**

Weinan E

\$75.00: Hb: 978-1-107-09654-7:  
488 pp.**Reversibility  
and Stochastic  
Networks**

F. P. Kelly

*Cambridge Mathematical  
Library*\$49.00: Pb: 978-1-107-40115-0:  
238 pp.**Iterative Methods  
in Combinatorial  
Optimization**Lap-Chi Lau, R. Ravi,  
Mohit Singh*Cambridge Texts in  
Applied Mathematics*\$99.00: Hb: 978-1-107-00751-2  
\$39.99: Pb: 978-0-521-18943-9:  
256 pp.*Prices subject to change.*[www.cambridge.org/us/mathematics](http://www.cambridge.org/us/mathematics)

**CAMBRIDGE**  
UNIVERSITY PRESS

# INSTRUCTIONS FOR CONTRIBUTORS

**CONTRIBUTIONS.** Contributions are welcomed from all countries and must be written in English.

**MANUSCRIPTS.** Three copies of manuscripts should be sent to:

SHELDON ROSS, Editor  
*Probability in the Engineering and Informational Sciences*  
Epstein Dept. of Industrial and Systems Engineering  
University of Southern California  
3715 McClintock Ave.  
Los Angeles, CA 90089-0193, U.S.A.  
E-mail: smross@usc.edu

Authors should also retain one copy of the manuscript for proof checking as manuscripts sent to the Editor cannot be returned. Before an issue is typeset, the lead author of each article will be asked to send a LaTeX file of the final revised version to the PEIS Project Manager (as an e-mail attachment).

Manuscripts are accepted for review with the understanding that the same work has not been and will not be published, nor is presently submitted elsewhere. While under editorial review, it is the responsibility of the author to keep the Editor informed about submissions, publication plans, and actual publication of related research or abstracts thereof in other outlets, including journals, review publications, journals in other disciplines, conference proceedings, and published dissertations. It is also understood that all persons listed as authors have given their approval for the submission of the paper and that any person cited as a source of personal communication has given his/her approval for such citation; written authorization may be required at the Editor's discretion. An author is required to obtain written permission for material for which he/she does not own copyright.

**MANUSCRIPT ORDER.** Manuscripts should be arranged as follows (starred items are optional):

- |                        |                           |
|------------------------|---------------------------|
| 1. Title Page (Page 1) | *6. Appendix(es)          |
| 2. Abstract            | *7. Footnotes             |
| 3. Text                | *8. Tables with titles    |
| *4. Acknowledgments    | *9. Figures with captions |
| 5. References          |                           |

**PREPARATION OF MANUSCRIPT.** The entire manuscript, including all notes and references, must be typed, **double-spaced** on  $8\frac{1}{2} \times 11$  inch or A4 paper leaving wide margins for copyediting. Manuscript pages should be numbered consecutively. The title page should list (a) the title of the paper in all uppercase letters, (b) an e-mail address for the contact author. This author will be asked to provide a LaTeX file of the final revised version of the manuscript. (Later, proofs and an offprint order form will be sent to this e-mail address as PDF files), (c) a short title of 50 characters or less to be used as a running head, and (d) all authors' names, affiliations, and e-mail addresses as they should appear for publication. Any footnotes to the authors should be listed on this page. An abstract of 100 words or less should appear here or on the following page and should be clearly differentiated from the text. (Acknowledgments and recognition of grants or other support should be listed in a separate section following the text.)

**EQUATIONS.** All equations must be typewritten and numbered. Equation numbers should appear in parentheses in the right-hand margin. Text references to equations take the following form: "For a further discussion of this material, see Eq. (3.2)." All superscripts and subscripts in equations must be clearly typed above and below the line, respectively. End of proof signposts should appear as such: ■.

**TABLES AND FIGURES.** Tables and figures should be numbered consecutively and appear as one unit after the Reference section. All tables must have titles and all figures must have captions. All tables and figures must have at least one text reference that takes the following form: "For a different view of this matter see Table 1 and Figure 3." Tables may have footnotes that follow directly after the body of the table. Table source notes should follow table footnotes.

Figures must be submitted ready for reproduction. Authors are encouraged to submit figures in electronic form, preferably TIFF (line drawings at least 600 dpi, gray scale at least 300 dpi) or EPS (with fonts embedded) format. Figures should be submitted as high-resolution files. TeX or LaTeX files of figures are not usable. TIFF, EPS, or PDF files must be provided for all figures. Figures should remain legible at a 50% reduction, and letters within a word should not touch one another. Labels on the figures should correspond to text notation as to italic or roman typeface, and superscripts and subscripts should be in superior and inferior positions.

**FOOTNOTES.** When more than a simple reference citation is needed, footnotes may be used. In general, however, they should be avoided.

**REFERENCES AND TEXT CITATIONS.** Complete bibliographic information should be given in the Reference section where references are to be listed alphabetically. The first reference that appears in the alphabetical list should be numbered "1" and subsequent references should be numbered accordingly. **All references must be cited in the text.** Use the author's last name and the reference number in brackets. For three authors, give all names at the first citation; subsequently use first author and "et al." Below are examples of both text citations and a sample reference list.

Smith and Wollensky [4] have ascertained that the stress factor on metal parts varies with the amount of heavy metal ions included in such metal composition. According to Bishop et al. [1], this variance takes on an exponential factor not unlike that shown in the Mathew's Variable Rate Differential (see Mathew [3, p. 110]). Wing stress tests conducted by the Max Einschuss Laboratory [2] have verified such findings.

## References

## Journal names must not be abbreviated.

For general stylistic questions, *The Chicago Manual of Style* (14th edition) should be used.

**COPYEDITING AND PROOFREADING.** The publisher reserves the right to copyedit all articles accepted for publication. Authors will be asked to review proofs of their articles to correct any typographical or technical errors.

**COPYRIGHT ASSIGNMENT.** Authors will be required to transfer their copyright, on certain conditions, to Cambridge University Press.

# PROBABILITY in the Engineering and Informational Sciences

Volume 26      2012      Number 1

## CONTENTS

<i>Renewal Sequences with Periodic Dynamics</i> Brian Fralix, James Livsey, and Robert Lund	1
<i>Wait-and-See Strategies in Polling Models</i> Frank Aurzada, Sergej Beck, and Michael Scheutzow	17
<i>New Properties of the Total Time on Test Transform Order</i> Taizhong Hu, Yashi Wang, and Weiwei Zhuang	43
<i>Monotonicity Properties of Residual Lifetimes of Parallel Systems and Inactivity Times of Series Systems with Heterogeneous Components</i> Weiyong Ding, Xiaohu Li, and Narayanaswamy Balakrishnan	61
<i>Optimal Markdown Pricing Strategy with Demand Learning</i> H. Dharma Kwon, Steven A. Lippman, and Christopher S. Tang	77
<i>The Speed of Random Walks on Trees and Electric Networks</i> Mokhtar Konsowa and Fahimah Al-Awadhi	105
<i>Combinatorial Approach to Computing Component Importance Indexes in Coherent Systems</i> Ilya B. Gertsbakh and Yoseph Shpungin	117
<i>Some Extensions of the Residual Lifetime and its Connection to the Cumulative Residual Entropy</i> Stella Kapodistria and Georgios Psarrakos	129
