Abstract Page. Include (a) a full article title, (b) an abstract of no more than 200 words, and (c) up to five keywords for indexing and information retrieval.

Text. Use a standard paragraph indent. Do not hyphenate words at the ends of lines or justify right margins.

References. Bibliographic citations in the text must include the author’s last name and date of publication and may include page references. Examples of in-text citation style are Cicchetti (2002), Durston (2008, pp. 1133–1135), Hunt and Thomas (2008), (Hunt & Thomas, 2008), (Posner, Rothbart, Sheese, & Tang, 2007), and subsequently (Posner et al., 2007). If more than one, citations must be in alphabetical order. Every in-text citation must be included in the reference section; every reference must be cited in the text. Examples of reference styles:

Journal Article

Book

Chapter in an Edited Book

Appendix (optional). Use only if needed.

Tables. Tables must be submitted as a separate MSWord file. Each table should begin on a separate page, and be typed double-spaced, numbered consecutively with an Arabic numeral, and given a short title (e.g., Table 5. Comparison on language variables). All tables must be clearly cited in the text, and must be clearly labeled at the location they are to appear, for example, “TABLE ONE HERE.”

Figures. Figures must also be submitted as separate files, in either .TIFF or .JPG format. Each figure must be numbered consecutively with an Arabic numeral and a descriptive legend. Legends must be provided separately from the artwork (e.g., Figure 3. The progress in language development). Figures, which are normally in black and white, should be no larger than 6 × 9 in. If authors request color figures in the printed version, they will be contacted by CCC-Rightslink who are acting on our behalf to collect Author Charges. Please follow their instructions in order to avoid any delay in the publication of your article. Online-only color is provided free of cost. Diagrams must be computer generated. All labels and details must be clearly presented and large enough to remain legible at a 50% reduction. Artwork should be identified by figure number and short title. All figures must be cited in the text, and their location labeled in the same manner as Tables.
Copyediting and Page Proofs
The publisher reserves the right to copyedit manuscripts to conform to journal style. The corresponding author will receive page proofs for correction of typographical errors only. No rewriting of the original manuscript as submitted is allowed in the proof stage. Authors must return proofs to Cambridge within 48 hr of receipt or approval will be assumed.

Offprints
The corresponding author will receive a free high-quality PDF of his or her article. A form accompanying the page proofs allows the corresponding author to order complete copies of the issue and/or purchase offprints. All coauthor offprint requirements must be included on this form. Orders received after the issue is printed are subject to a 50% reprint surcharge.

Copyright and Originality
It is a condition of publication that all manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. All authors must sign the Transfer of Copyright Agreement, which is available from ScholarOne Manuscripts, before an article can be published. Government authors whose articles were created in the course of their employment must so certify in lieu of copyright transfer. Authors must obtain written permission from the copyright owners to reprint any previously published material included in their article and provide the permissions to Cambridge University Press.

In addition, authors must obtain permission from copyright owners to reprint or duplicate published measures or modifications to any published instruments. If applicable, written permission must be submitted with final manuscripts.

Open Access
Authors in Development and Psychopathology have the option to publish their paper under a fully Open Access agreement, upon payment of a one-time Article Processing Charge. In this case, the final published Version of Record will be made freely available to all in perpetuity under a Creative Commons license, enabling its reuse and redistribution. This Open Access option is only offered to authors upon acceptance of an article for publication.

Authors choosing the Open Access option are required to complete the Open Access Transfer of Copyright form. More information about Open Access in Development and Psychopathology, including the current Article Processing Charge, can be found on our website.

Author Language Services
Cambridge recommends that authors have their manuscripts checked by an English language native speaker before submission; this will ensure that submissions are judged at peer review exclusively on academic merit. We list a number of third-party services specializing in language editing and/or translation and suggest that authors contact as appropriate. Use of any of these services is voluntary and at the author’s own expense.
