### Instructions to Contributors.

Articles submitted for publication in the *Geological Magazine* should be  
addressed to the Editors at the *Sedgwick Museum, Cambridge*, not to the  
Publishers.

Manuscripts should be typewritten, double-spaced, and preferably with a  
wide margin, and should be carefully revised; they should be as concise as  
possible and should not exceed 10,000 words. In the case of a long article  
allowance must be made for text-figures at the rate of approximately twenty  
words per sq. in. MS. must be accompanied by a short abstract, 50-100 words.  
References should not be given in footnotes, but arranged in alphabetic order  
of author's names at the end of the article; the author's name should be  
followed by date of publication, and the title of each paper should be given in  
addition to volume and page numbers of the Journal, thus:—

LAPWORTH, C. 1878. The Moffat Series. *Quart. Journ. Geol. Soc.*, xxxiv,  
240-343.

References should be cited in the text by author's name and date, with page  
reference if necessary, in brackets:—(Lapworth, 1878, p. 339).

Illustrations should be so drawn as to allow reduction to a maximum size of  
 $6\frac{1}{2} \times 3\frac{1}{2}$  inches (the type-area of the Magazine) and originals must not exceed  
 $40 \times 22$  inches. Map lettering should be such as to be clearly legible after  
reduction (equivalent to 5-point as a *minimum* on reduction), while lettering  
on text-figures should in general be left in pencil for printing.

Authors will receive 25 reprints free of cost.
