

CAMBRIDGE

## Fantastic Titles from Cambridge University Press

### **Biology of Snail-Killing Sciomyzidae Flies**

Lloyd Vernon Knutson *and*  
Jean-Claude Vala

An analysis of all of the major biological aspects of the Sciomyzidae flies, including behavior, ecology, life-cycles, morphology, and identification.

\$150.00: Hardback: 978-0-521-86785-6: 526 pp.

### **Insect Ecology**

**Behavior, Populations and Communities**

Peter W. Price, Robert F. Denno, Micky D. Eubanks,  
Deborah L. Finke, *and* Ian Kaplan

Combining breadth of coverage with detail, this cohesive introduction to insect ecology couples concepts with empirical examples and practical applications.

\$165.00: Hardback: 978-0-521-83488-9: 816 pp.

\$85.00: Paperback: 978-0-521-54260-9

### **Animal Camouflage Mechanisms and Function**

*Edited by* Martin Stevens *and*  
Sami Merilaita

Synthesizes the current status of camouflage research and understanding, presenting recent developments and demonstrating the important problems that remain.

\$125.00: Hardback: 978-0-521-19911-7: 376 pp.

\$65.00: Paperback: 978-0-521-15257-0

*Prices subject to change.*

# NOTES FOR AUTHORS

Please see the complete version ("Instructions for Contributors") at [journals.cambridge.org/ber](http://journals.cambridge.org/ber)

## Styles of Paper

*Bulletin of Entomological Research* publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.

We also welcome 'Letters to the Editor' with comments on recently published papers.

## Manuscript Preparation

### Language

Manuscripts should be in English.

### Manuscript content

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings
- Acknowledgements (if any)
- References (for further information about presenting references please see below)
- Tables, either at the end of the manuscript or as separate files. Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.
- Illustrations should be submitted as separate files in TIF or EPS format but captions should be listed at the end of the manuscript text.

### Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

### References

References must be based on the name and year system, give full journal titles and conform to the following styles:

**Follett, P.A. & Roderick, G.K.** (1996) Genetic estimates of dispersal ability in the leucaena psyllid predator *Curinus coeruleus* (Coleoptera: Coccinellidae): implications for biological control. *Bulletin of Entomological Research* **86**, 355–361.

**Nevill, E.M., Kappmeier, K. & Venter, G.J.** (1993) Tsetse fly research in Zululand. p. 81 in *Proceedings of the ninth Entomological Congress organized by the Entomological Society of Southern Africa, Johannesburg, 28 June–1 July 1993* Pretoria, Entomological Society of South Africa.

**Wilson, M.D. & Post, R.J.** (1994) Integration of morphometric, cytogenetic and molecular techniques: a case study of *Simulium damnosum* pp. 215–224 in *Hawksworth, D.L. (Ed.) The identification and characterization of pest organisms*. Wallingford, CAB International.

Please list papers by more than two authors, but with the same first author, by year sequence and alphabetically within each year. Citation of authors in the text should appear in the form: Polaszek (1996) or (Polaszek, 1996). Authors should be cited in chronological order as: (Blackman *et al.*, 1994; Roberts & Kumar, 1995).

### Tables

Tables should be in a simple form and should not be used if text or illustrations give the same information. They can either be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript file. Each table must have a clear and concise caption.

### Illustrations

Illustrations should be submitted in TIF or EPS format at approximate final publication size. Resolution of artwork should

be at the following minimum resolutions: Line artwork (black & white), 1200dpi; Combination, i.e. line/tone (greyscale), 800dpi; Black & White halftone (greyscale), 300dpi; and Colour halftone, 300dpi. Comprehensive guidance on creating suitable electronic figures is available at [http://dx.sheridan.com/guidelines/digital\\_art.html](http://dx.sheridan.com/guidelines/digital_art.html) where you will find extensive guidelines on preparing electronic figures. An online preflighting tool (<http://dx.sheridan.com/index.html>) is also available where you can check if your figures are suitable for reproduction. Captions should be listed at the end of the manuscript text.

### Supplementary Material

Additional information which due to its nature does not lend itself to print media (examples- full data sets, movie or sounds files etc...) may be submitted for online-only publication. Please see full details ("Instructions for Contributors") at [journals.cambridge.org/ber](http://journals.cambridge.org/ber).

### Technical and Nomenclature Standards

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

### Manuscript Preparation

We kindly ask that you follow the instructions below when preparing your manuscript for submission. This will minimize the risk of errors being introduced during the publishing process.

- Use double-line spacing and ample margins (at least 2.5cm) on each side.
- Do not underline anything
- Use line numbers
- Do not indent the start of each paragraph
- Use italics for taxonomic nomenclature and bold for headings
- Use standard abbreviations (e.g. Fig. and Figs) and SI units
- Use British rather than American Spellings and 'z' rather than 's' spellings in words with 'ize'.

### Voucher specimens

The deposition of voucher specimens should be considered where appropriate.

### Manuscript Submission

All manuscripts should be submitted via our on-line system, Editorial Manager, at <http://www.editorialmanager.com/ber>. New users will need to register first.

### Peer review

Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of the manuscript. Please also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

### Publication

#### Copyright

Authors will be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the *Bulletin* and has not been previously published elsewhere.

#### Proofs

Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

#### Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage.

Research papers

- D.J. Skirvin, L. Kravar-Garde, K. Reynolds, C. Wright and A. Mead**  
The effect of within-crop habitat manipulations on the conservation biological control of aphids in field-grown lettuce 623
- L.F. Chaves and U.D. Kitron**  
Weather variability impacts on oviposition dynamics of the southern house mosquito at intermediate time scales 633
- F.S.M. Barros, M.E. Arruda, H.C. Gurgel and N.A. Honório**  
Spatial clustering and longitudinal variation of *Anopheles darlingi* (Diptera: Culicidae) larvae in a river of the Amazon: the importance of the forest fringe and of obstructions to flow in frontier malaria 643
- S.P. Foster, I. Denholm, G.M. Poppy, R. Thompson and W. Powell**  
Fitness trade-off in peach-potato aphids (*Myzus persicae*) between insecticide resistance and vulnerability to parasitoid attack at several spatial scales 659
- M. Branco, I. van Halder, J.C. Franco, R. Constantin and H. Jactel**  
Prey sex pheromone as kairomone for a new group of predators (Coleoptera: Dasytidae, *Aplocnemus* spp.) of pine bast scales 667
- B.A. Hatteland, W.O.C. Symondson, R.A. King, M. Skage, C. Schander and T. Solhøy**  
Molecular analysis of predation by carabid beetles (Carabidae) on the invasive Iberian slug *Arion lusitanicus* 675
- C. Tantrawatpan, W. Saijuntha, W. Pilab, K. Sakdakham, P. Pasorn, S. Thanonkeo, Thiha, R. Satrawaha and T. Petney**  
Genetic differentiation among populations of *Brachytrupes portentosus* (Lichtenstein 1796) (Orthoptera: Gryllidae) in Thailand and the Lao PDR: the Mekong River as a biogeographic barrier 687
- O. Mittapalli, L. Rivera-Vega, B. Bhandary, M.A. Bautista, P. Mamidala, A.P. Michel, R.H. Shukle and M.A.R. Mian**  
Cloning and characterization of *mariner*-like elements in the soybean aphid, *Aphis glycines* Matsumura 697
- O.P.L. Vindstad, S.B. Hagen, J.U. Jepsen, L. Kapari, T. Schott and R.A. Ims**  
Phenological diversity in the interactions between winter moth (*Operophtera brumata*) larvae and parasitoid wasps in sub-arctic mountain birch forest 705
- A.V. Gumovsky and M.M. Ramadan**  
Biology, immature and adult morphology, and molecular characterization of a new species of the genus *Entedon* (Hymenoptera: Eulophidae) associated with the invasive pest *Specularius impressithorax* (Coleoptera: Chrysomelidae, Bruchinae) on *Erythrina* plants 715
- D. Gerling, M. Guershon, E. Erel and M. Inbar**  
Diapause and its regulation in the whitefly *Trialeurodes lauri* 741
