

The following papers have been accepted for publication and will appear shortly:

HANNAN, E. J. Exact tests for serial correlation in vector processes.

LIGHTHILL, M. J. The image system of a vortex element in a rigid sphere.

ROUTLEDGE, N. A. Logic on electronic computers.

AFRIAT, S. N. Simultaneous linear differential equations with constant coefficients.

AFRIAT, S. N. The approach to scalar growth of a vector transformed by an increasing power of a matrix.

BROADBENT, S. R. A measure of dispersion applied to cosmic-ray and other problems.

STEWARTSON, K. Motion of a sphere through a conducting fluid in the presence of a strong magnetic field.

DAVIES, R. O. Non- σ -finite closed subsets of analytic sets.

HEINE, V. The thermodynamics of bodies in static electromagnetic fields.

JONES, C. W. An improved linear perturbation theory of steady supersonic flow with axial symmetry.

NORTHCOTT, D. G. Abstract dilatations and infinitely near points.

GRIMSHAW, M. E. On Taylor's theorem.

BOLTON, H. C. and SCOINS, H. I. Eigenvalues of differential equations by finite difference methods.

RHODES, F. A generalization of isometries to uniform spaces.

HIGMAN, G. On finite groups of exponent five.

WYNN, P. A Procrustean technique for the numerical transformation of slowly convergent sequences and series.

CONTENTS OF BIOLOGICAL REVIEWS

Vol. 31, Part 1. February 1956

K. R. SPORNE. The phylogenetic classification of the angiosperms.

P. M. BUTLER. The ontogeny of molar pattern.

J. S. K. BOYD. Bacteriophage.

CONTENTS

	PAGE
HIGMAN, GRAHAM. On a conjecture of Nagata	1
M ^C LAIN, D. H. On locally nilpotent groups	5
REES, D. A basis theorem for polynomial modules	12
PENROSE, R. On best approximate solutions of linear matrix equations	17
BESICOVITCH, A. S. On the definition of tangents to sets of infinite linear measure	20
DAVIES, ROY O. A property of Hausdorff measure	30
ROGERS, K. Complex homogeneous linear forms	35
MAHLER, K. On the Taylor coefficients of rational functions	39
LINDEN, C. N. Functions regular in the unit circle	49
JEFFREYS, HAROLD. On the use of asymptotic approximations of Green's type when the coefficient has zeros	61
HAJNAL, J. The ergodic properties of non-homogeneous finite Markov chains	67
HAMMERSLEY, J. M. The area enclosed by Pólya's walk	78
LITTLEWOOD, D. E. The behaviour of the universe	88
HAMILTON, J. Centre-of-mass state vectors	97
GARSTANG, R. H. The effect of configuration interaction on forbidden line strengths	107
COULSON, C. A. and MARCH, N. H. Molecules with tetrahedral and octahedral symmetry. IV. A modified Thomas-Fermi scheme for molecules with heavy atoms in the outer positions	114
TAYLOR, J. G. Classical electrodynamics as a distribution theory	119
PHILLIPS, O. M. The final period of decay of non-homogeneous turbulence	135
 RESEARCH NOTES:	
GRAVETT, K. A. H. A characterization of frontier	152
DAVIES, ROY O. A note on linear derivates of measurable functions	153
REES, D. Two classical theorems of ideal theory	155
SAWYER, D. B. A remark on translated sets	157
