Language Variation and Change is dedicated to the description and understanding of variability and change at the levels of the speaker/hearer and the sociolinguistic context in which it is manifested in linguistic structure.

Manuscript Preparation and Style

Manuscripts should be under 10,000 words, plus abstract, notes, and references. Two copies of the manuscript should be submitted electronically to lvcjournal@psu.edu. Please include both a Word and PDF version. Authors must provide dependent variable percentages or mean values and the number of tokens for each factor (category). For any statistical analysis uncommon in published research reports that are based on data of language production, either oral or written, from contemporary or historical sources. Articles that synthesize or reanalyze a number of research findings on substantive issues will also be considered. Conforming to scientific methodology, the reported findings should be fully replicable from the information provided.

Contributions should be submitted electronically to RENA TORRES CACOULLOS at: lvcjournal@psu.edu. Please include both a Word and PDF version.

Submission of an article is taken to imply that it has not been previously published or is not being considered for publication elsewhere. If an author is publishing a related article, this fact should be stated.

Copyright. Contributors of accepted articles will be asked to assign their copyrights, on certain conditions, to Cambridge University Press, to help protect their material, particularly in the U.S.A.

Endnotes should be used when more than a simple citation is required. Notes should be numbered consecutively throughout the text and typed together on a separate page preceding the reference section.

Reporting Results. For regression analysis, provide the rate or mean value for the dependent variable and the number of observations (n = XXX) for each level of a categorical independent variable.

Tables and Figures. All tables and figures should be identified by a sufficiently self-explanatory title. Include total number of observations when applicable (n = XXX). All tables and figures must be cited in the text.

Contributors of accepted articles will be provided with a proof copy of their article. Cambridge University Press reserves the right to make editorial changes to accept an article.

Language Variation and Change publishes original research reports that are based on data of language production, either oral or written, from contemporary or historical sources. Articles that synthesize or reanalyze a number of research findings on substantive issues will also be considered. Conforming to scientific methodology, the reported findings should be fully replicable from the information provided.
