Essentials of Managerial Finance 2/e

John J. Pringle / Robert S. Harris
The University of North Carolina, Chapel Hill

- ▶ Expanded discussion of financial market information, financial futures and hedging, options, currency options, stock repurchases, and hostile takeovers
- ▶ New material on "junk" bonds, corporate takeovers, market efficiency, agency costs, risk analysis, and techniques of financing the firm
- ▶ Improved presentation of ratio analysis and capital budgeting
- ▶ Superb pedagogical emphasis on why topics are important and the boundaries of their use

Financial Management

Robert W. Kolb, University of Miami

- ▶ Early emphasis on working capital
- ▶ Excellent discussions of the risk-return trade-off, capital budgeting and estimation of cash flows, ratio analysis, and the time value of money
- ▶ "Finance Today" contemporary applications, plus "International Applications" with a modern, worldwide perspective

Finesse: A Software Kit for Learning Financial Concepts

Robert W. Kolb

A new introductory finance package, with 2 disks and a 300-page manual, designed for student drill on the IBM PC in all basic finance concepts.

Investment: Concepts, Analysis, and Strategy 2/e

Robert C. Radcliffe, University of Florida
Increased focus on portfolio theory and efficient markets, superb new chapter on portfolio management, and expanded discussion of financial futures. New student workbook with extensive problem sets; software data sets.

Money, Financial Institutions and Economic Activity

Bruce R. Dalgaard, University of Minnesota
Unique industrial organization approach helps students understand the changing structure of the financial system and the effects of these changes on monetary policy.

Options: Theory, Strategy, and Applications

Peter Ritchken, Case Western Reserve University
Three-hundred page paperback with full chapters on currency options and options on futures; two full chapters on the Black/Scholes Model; and excellent coverage of interest rate swaps.
