

Experimental Agriculture

INSTRUCTIONS TO CONTRIBUTORS

Electronic Submission of Manuscripts

Contributions for consideration for publication should be submitted online at <http://www.editorialmanager.com/eag>

Editorial Policy

With a focus on the tropical and sub-tropical regions of the world, *Experimental Agriculture* publishes the results of original research on field, plantation and herbage crops grown for food or feed, or for industrial purposes, and on farming systems, including livestock and people. It reports experimental work designed to explain how crops respond to the environment in biological and physical terms, and on the social and economic issues that may influence the uptake of the results of research by policy makers and farmers, including the role of institutions and partnerships in delivering impact. The journal also publishes accounts and critical discussions of new quantitative and qualitative methods in agricultural research, and of contemporary issues arising in countries where agricultural production needs to develop rapidly. There is a regular book review section and occasional, often invited, reviews of research. Most papers are published within six months from acceptance.

The minimum standards for a paper to be considered by the Editor and the referees are set out below:

- The title page, all headings and the references must conform to the style of *Experimental Agriculture*.
- Each table and figure must be cited in the text of the typescript.
- All figures to be supplied as separate TIFF or EPS files wherever possible.
- The statistical treatment of experimental data must conform to the instructions given in Riley, J. (2001). Presentation of statistical analyses. *Experimental Agriculture* 37: 115–123.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Experimental Agriculture

Special Issue on Assessing and Addressing Climate-induced Risk in Sub-Saharan Rainfed Agriculture

CONTENTS

Cooper, P. J. M. and Coe, R. Assessing and addressing climate-induced risk in sub-Saharan rainfed agriculture. Foreword to a special issue of Experimental Agriculture	179
Jarvis, A., Lau, C., Cook, S., Wollenberg, E., Hansen, J., Bonilla, O. and Challinor, A. An integrated adaptation and mitigation framework for developing agricultural research: Synergies and trade-offs	185
Hansen, J. W., Mason, S. J., Sun, L. and Tall, A. Review of seasonal climate forecasting for agriculture in sub-Saharan Africa	205
Stern, R. D. and Cooper, P. J. M. Assessing climate risk and climate change using rainfall data – a case study from Zambia	241
Rao, K. P. C., Ndegwa, W. G., Kizito, K. and Oyoo, A. Climate variability and change: Farmer perceptions and understanding of intra-seasonal variability in rainfall and associated risk in semi-arid Kenya	267
Osbah, H., Dorward, P., Stern, R. and Cooper, S. Supporting agricultural innovation in Uganda to respond to climate risk: Linking climate change and variability with farmer perceptions	293
Dixit, P. N., Cooper, P. J. M., Dimes, J. and Rao, K. P. Adding value to field-based agronomic research through climate risk assessment: A case study of maize production in Kitale, Kenya	317
Gathenya, M., Mwangi, H., Coe, R. and Sang, J. Climate- and land use-induced risks to watershed services in the Nyando River Basin, Kenya	339
Farrow, A., Musoni, D., Cook, S. and Buruchara, R. Assessing the risk of root rots in common beans in East Africa using simulated, estimated and observed daily rainfall data	357
Ouma, R., Mude, A. and van de Steeg, J. Dealing with climate-related risks: Some pioneering ideas for enhanced pastoral risk management in Africa	375
Coe, R. and Stern, R. D. Assessing and addressing climate-induced risk in sub-Saharan rainfed agriculture: Lessons learned	395
Book reviews	411
