JOURNAL OF INSTITUTIONAL ECONOMICS

STATEMENT OF AIDS

Institutions are the stuff of social and economic life. The creation and development of understanding the role of institutions in economic growth is a new undertaking. The Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other vital institutions and organizations. It welcomes contributions by all schools of thought that can contribute to the understanding of the features, development and functions of real world economic institutions.

SUBMISSION

All manuscripts must be submitted online via the journal’s Manuscript Central site at http://mc.manuscriptcentral.com/joe

Detailed instructions for submitting your paper can be found at the “Instructions for Authors” link in the left top corner, and then clicking on the “Author Submissions” icon on the right side of the screen.

The Editor will acknowledge receipt of the manuscript; provide it with a manuscript reference number and assign it to an editor. The reference number of the manuscript should be quoted in all correspondence with JOIE Office and Publisher.

ARTICLE

There must be no indication of the personal identity or institution of any author of the article within the article itself, or in the ‘property of’ the electronic file. Normally, articles (including footnotes and references) must be no longer than 9,000 words. In special cases, such as an extended review or survey article, the latter may be extended to 12,000 words. A declaration of the total word count (including footnotes and references) must accompany the submitted article.

Papers with some formal content will be consulted if it is fully explained for a general readership, the mathematics is consigned as much as possible to appendices, the assumptions have sufficient grounding in reality, and the paper enhances our understanding of past, present or possible socio-economic institutions. JOIE is not interested in the advancement of formal or econometric techniques for their own sake.

The front page of the electronic file of the article should contain the title of the article, the title of the journal, the date of publication, the DOI, the ISSN (if the article is to be available online through a database), and the publisher’s name.

Submission of a paper should be made to the institution that is the article’s subject. The title of the article should be stated as it will appear in the final publication. The abstract should be kept to a minimum and the Harvard referencing system should be used.

The refereeing process will be made as much as possible to appendices, the assumptions have sufficient grounding in reality, and the paper enhances our understanding of past, present, or possible socio-economic institutions.

The Journal of Institutional Economics is not interested in the advancement of formal or econometric techniques for their own sake. The editors will only review papers that are submitted in electronic format.

BENEFIT LINKS

http://aeaweb.org/journal/JoIn

The Journal of Institutional Economics is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, political studies, sociology, geography, anthropology and philosophy. The Journal of Institutional Economics aims to provide a forum for authors with an expert voice on their articles within 90 days of submission.

The editors will make every effort to ensure that papers are reviewed in a timely manner. The refereeing process will be made as much as possible to appendices, the assumptions have sufficient grounding in reality, and the paper enhances our understanding of past, present, or possible socio-economic institutions. The Journal of Institutional Economics is not interested in the advancement of formal or econometric techniques for their own sake.

BENEFIT LINKS
