I N D E X .

	PAGE
BUTTERS, JOHN W.	
On the Use of Symmetry in Geometry, - - -	54
 COLLIGNON, EDOUARD.	
Remarques sur l'intégration des fonctions $a^n \cos a da, a^n \sin a da,$ - - -	2
 DAVIS, R. F.	
On the quadrilateral circumscribed to two circles, -	13
 GIBSON, Professor.	
Note on M. Collignon's Paper on the Integration of $a^n \cos a da$ and $a^n \sin a da,$ - - -	11
Note on the Treatment of Tangents in recent Text- books of Elementary Geometry, - - -	64
 HOLM, ALEXANDER.	
Some Points in Diophantine Analysis, - - -	40
 JACKSON, F. H.	
On some Algebraic Identities [Title], - - -	12
On a form of Maclaurin's Theorem [Title], - - -	12
A Basic-sine and cosine with symbolical solutions of certain differential equations, - - -	28
Note on a Theorem of Lommel, - - -	80
 MACLAGAN-WEDDERBURN, J. H.	
Note on the Linear Matrix Equation, - - -	49

MUIRHEAD, R. F.

- On the Use of the term *Power* in Geometry, and on the
treatment of the "doubtful sign," - - - - 68
- Solution of a Geometrical Problem, - - - - 74
- Minimum Deviation through a Prism, etc., - - - - 76

OFFICE-BEARERS, - - - - - 1

PICKEN, D. K.

- On the Fractional Infinite Series for
cosec x , sec x , cot x , and tan x , - - - 14
- Note on the method of finding the particular integral of
the differential Equation $f(D)y = \sum_1^n a_r x^r$, - - - 21

PINKERTON, PETER.

- Note on Mr Tweedie's Theorem in Geometry (page 22), 27
- The Turning Values of a Cubic Function and the nature
of the roots of a Cubic Equation, - - - - 86
- Note on the Problem : To draw through a given point
a transversal to (a) a given triangle (b) a given
quadrilateral so that the intercepted segments may
have (a) a given ratio (b) a given cross ratio [Title], 89

THOMSON, W. L.

- Note on a Theorem in Double Series [Title], - - - 12

TWEEDIE, CHARLES.

- Inequality Theorem regarding the lines joining corres-
ponding vertices of two equilateral, or directly
similar, triangles, - - - - - 22
- Note on Newton's Theorem of Symmetric Functions, - 90
