S 1 Reduced-order analysis of buffet flow of space launchers
V. Statnikov, M. Meinke & W. Schröder

S 26 Separations and secondary structures due to unsteady flow in a curved pipe
C. V. Krishna, N. Gundiah & J. H. Arakeri

60 An impulse-based approach to estimating forces in unsteady flow
W. R. Graham, C. W. Pitt Ford & H. Babinsky

S 77 Multiple solutions for granular flow over a smooth two-dimensional bump

S 117 On the genesis and evolution of barchan dunes: morphodynamics
A. Khosronejad & F. Sotiropoulos

149 Marginally stable and turbulent boundary layers in low-curvature Taylor–Couette flow
H. J. Brauckmann & B. Eckhardt

169 Local versus volume-integrated turbulence and mixing in breaking internal waves on slopes
R. S. Arthur, J. R. Koseff & O. B. Fringer

199 Rotational kinematics of large cylindrical particles in turbulence
A. D. Bordoloi & E. Variano

223 Evolution of the velocity gradient tensor invariant dynamics in a turbulent boundary layer
P. Bechhairs & R. D. Sandberg

243 Stability, intermittency and universal Thorpe length distribution in a laboratory turbulent stratified shear flow
P. Odier & R. E. Ecke

Contents continued on inside back cover.

257 Vortex breakdown, linear global instability and sensitivity of pipe bifurcation flows
K. K. Chen, C. W. Rowley & H. A. Stone

295 Genesis and evolution of velocity gradients in near-field spatially developing turbulence
P. Paul, G. Papadakis & J. C. Vassilicos

333 Large-scale-vortex dynamos in planar rotating convection
C. Guervilly, D. W. Hughes & C. A. Jones

361 Anisotropic Helmholtz and wave–vortex decomposition of one-dimensional spectra
O. Bühler, M. Kuang & E. G. Tabak

388 On steady non-breaking downstream waves and the wave resistance – Stokes’ method
D. V. Maklakov & A. G. Petrov

415 Lissajous trajectories in electromagnetically driven vortices
A. Figueroa, S. Cuevas & E. Ramos

435 Linear and nonlinear dynamics of pulsatile channel flow
B. Pier & P. J. Schmid

481 Shore protection by oblique seabed bars
L.-A. Couson, M. A. Jalali & M.-R. Alam

511 Direct numerical simulations of a high Karlovitz number laboratory premixed jet flame – an analysis of flame stretch and flame thickening

537 Natural convection in a corrugated slot
A. Abtahi & J. M. Floryan

EDITORIAL OFFICE

FAX 44 1223 325802; JFMproduction@cambridge.org
SUMMARY OF INSTRUCTIONS FOR AUTHORS

Full instructions are available on the JFM web page at http://journals.cambridge.org/flm

Submission

Authors wishing to have papers published in the Journal should submit them via the online submission and refereeing system, ScholarOne Manuscripts, at http://mc.manuscriptcentral.com/cup/jfm. Papers may be submitted to any editor or associate editor but JFM Rapids articles (10 printed pages or fewer) must be submitted to Professors Linden, Guazzelli, Peake or Wettlaufer who should be consulted in advance. Submission of a paper implies a declaration by the author that the work is not being considered for publication elsewhere and that it has not already been considered by a different editor of the Journal. Conference Reports must be submitted within three months of the meeting.

Preparation of papers

Authors are encouraged to write their papers clearly, concisely and attractively, so that their work will be readily understood. A brief summary of editorial requirements for notation, English and presentation is available on the JFM web page (address above). Authors are urged to use the JFM latex style macros. The [referee] option should be used for initial submission. The style file and template files are available at http://journals.cambridge.org/JFM_submission. While use of the JFM latex style file is preferred (and note that this is mandatory for JFM Rapids submissions), ordinary latex or plain tex files can also be accepted. Other software, such as Word, will be converted to latex by the Press or retyped. Manuscripts not prepared using the JFM latex style file should be typed in double spacing, with references listed at the end in alphabetical order of authors and with a separate list of figure captions.

Extensive detailed mathematical relations, tables or figures likely to be useful only to a few specialists will not be printed, but will be available as an electronic supplement to the online version or from the JFM Editorial Office.

Movies

Refereed movies that are integral to a paper can be supplied during the submission process and will be published as supplementary materials.

Accepted papers

Once a paper is accepted, final production files (e.g. the LaTeX source) must be uploaded to the ScholarOne Manuscripts site. Full details are given on the JFM web page. Do not email files to the JFM Editorial Office unless requested to do so.

Charges

There is no charge for publication, but the cost of any colour figures in standard articles must be borne by authors. Authors will receive a PDF file of their published article via email. For standard articles only, offprints can be purchased if ordered when the proofs are returned.

Address questions or comments to Mrs Amanda Johns (Editorial Assistant) or Mrs Alison James (Production Editor) at the Journals Department, Cambridge University Press, Shaftesbury Road, Cambridge CB2 8BS, UK; tel: 44 (0)1223 347922; fax: 44 (0)1223 325802; e-mail: JFMproduction@cambridge.org.
