ARTICLE

Engineers are driven to develop cutting-edge solutions to many challenges, and to that end, researchers publish their work in a variety of venues. The Journal of Materials Research (JMR) seeks to fulfill the needs and expectations of the engineering community by publishing diverse original research articles that demonstrate new insights into the fundamental science of materials and their applications. Each issue of the journal contains a broad range of new research that is generally of interest to the broad materials community. Researchers publish their results in JMR to communicate their findings and to engage the community in discussions. This page is intended to provide guidance to authors and to describe the requirements for preparing manuscripts and submitting them to JMR.

ARTICLE

Manuscripts

Manuscripts must be submitted electronically as a single PDF file through ScholarOne Manuscripts, the online submission system. For assistance with ScholarOne Manuscripts, see the Help section of the ScholarOne site and the Tutorial: Preparing Manuscripts for Submission to ScholarOne Manuscripts. Manuscripts must be prepared in English, using a word processing program, formatted to fit 8 ½ × 11 in. paper, and saved as .doc or .pdf files (accepted for publication, and cannot be modified later in the process). Separate graphics files (.eps and .tif) must be uploaded for each figure. Authors may also upload .xls or .ppt supplemental files as part of the manuscript submission process. All of these files will be converted to .pdf format. Detailed instructions are available on the submission website. During submission, authors must enter all coauthor names and e-mail addresses. Manuscripts will not be considered for peer review until this information is provided. Authors must also enter manuscript keywords using the JMR keyword list (located on the submission website). Authors who are not fluent in English must have their manuscript edited for correct English grammar and sentence structure before submission.

Authors are expected to follow the conventional writing, notation, and illustration style prescribed in Scientific Style and Format: the CSE Manual for Authors, Editors and Publishers, 7th edition, 2006. Authors should also study the form and style of printed material in this journal. SI units should be used. Authors should use an identical format for their names in all publications to facilitate use of citations and author indexes.

Manuscripts are accepted with the understanding that they represent original research, except for review articles, and that they have not been copyrighted, published, or submitted for publication elsewhere. Authors submitting manuscripts to JMR who have related material under consideration or in press elsewhere should send a copy of the related material to JMR at the time of submission. While their manuscripts are under consideration at JMR, authors must disclose any such related material. To expedite the review process, authors may provide names and contact information for up to four possible reviewers.

Articles are original research reports that include complete, detailed, self-contained descriptions of research efforts. All articles must contain an abstract and section headings.

Commentaries and Reviews: Journal of Materials Research occasionally publishes commentaries on topics of current interest or reviews of the literature in a given area. If an author proposes a review, the title, abstract, and a brief outline should be submitted to the Editorial Office via e-mail for prior consultation on the appropriateness of the topic.

Color policy: It is not necessary for authors to indicate that a figure should be displayed in color online. JMR will assume that any author who submits figures in color wants and agrees to their being produced in color online. Figures may be printed in color at the author’s request for an additional charge. Color figures must be submitted before the paper is accepted for publication, and cannot be received later in the process. Authors cannot submit two versions of the same figure, one for color and one for black and white; only one version can be submitted. Authors need to carefully consider the following when submitting figures in color that will be published in color online only: 1) The colors chosen must reproduce effectively and the colors should be distinguishable when printed in black and white; 2) The descriptions of figures in text and captions must be sufficiently clear for both online and print copy. When submitting figures to be published in color online only, authors should include the phrase <<color online>> in the figure captions. This is the author’s responsibility. Authors will see these color figures when viewing their author page proofs on screen. Authors should always print their page proofs in black and white to see how they will appear in print. Authors will NOT be allowed to submit color figures to replace black and white figures in the page proof stage. To maximize the probability that figures will be published in color online and also print as good quality black and white or grayscale graphics, authors are encouraged to follow these figure submission guidelines: 1) Submit a color graphic in Tagged Image File Format (.tif); 2) Submit color graphics with a resolution of at least 300 dpi (600 dpi if there is text or line art in the figure); 3) Submit color graphics in CMYK format; 4) Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary; 5) Submit multipart figures in one single electronic file.

POSTMASTER: Send address changes to Journal of Materials Research, c/o Journals Dept., Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA.

Subscriptions, renewals, address changes, and single-copy orders should be addressed to Subscription Fulfillment, Journal of Materials Research, Cambridge University Press, One Liberty Plaza, 20th Floor, New York, NY 10006, USA (for USA, Canada, and Mexico); or Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge, CB2 8BS, England (for UK and elsewhere). Allow at least six weeks advance notice. For address changes, please send both old and new addresses and, if possible, include a mailing label from a recent issue. Requests from subscribers for missing journal issues will be honored without charge only if received within six months of the issue’s actual date of publication; otherwise, the issue may be purchased at the single-copy price.

Reprints of individual articles in Journal of Materials Research may be ordered. For information on reprints, please contact Cambridge University Press. Reprints of complete back issues older than the prior volume year may be ordered on an individual basis via Cambridge Core. To determine availability, visit the appropriate page for the JMR back issue desired (cambridge.org/jmr).

Individual member subscriptions are for personal use only.
Journal of
MATERIALS RESEARCH

Editor-in-Chief: Gary L. Messing, Ceramic materials, The Pennsylvania State University, USA
Associate Editor: Susmita Bose, Biomaterials, Washington State University, USA
Associate Editor: Mathias Göken, Advanced metallic materials, Friedrich-Alexander-University Erlangen-Nürnberg, Germany
Associate Editor: Sarah E. Morgan, Polymeric materials, The University of Southern Mississippi, USA

2020 Principal Editors:

Amit Bandyopadhay, Hard biomaterials, Additive manufacturing, Washington State University, USA
Ricardo H.R. Castro, Interfaces thermodynamics, Calorimetry, Ceramics, University of California, Davis, USA
Venu G. Varanasi, Amorphous materials, biomimetics, bioprinting, University of Texas at Arlington, USA
Kanteish Balani, Biomaterials, high temperature ceramics, Indian Institute of Technology, Kanpur
Peng Tao, Solar/thermal energy materials, polymer composites, Shanghai Jiao Tong University, China
Jinju Chen, Soft materials/thin films, Nanoindentation, Newcastle University, United Kingdom
Xiaobo Chen, Photocatalysis and batteries, University of Missouri-Kansas City, USA
Sung-Yoon Chung, Energy, Electron microscopy, Interface science, KAIST, Korea
Sylvain Deville, Ceramic materials, Processing, Bioinspired materials, CNRS, France
Franz Faupel, Functional nanomaterials, VPD, Metallic glasses, University of Kiel, Germany
Michael C. Gao, High entropy alloys, Computational materials science, National Energy Technology Laboratory/AECOM, USA
Erik G. Herbert, Nanoindentation, Small-scale mechanical behavior, Michigan Technological University, USA
Jon Ihlefeld, Ferroelectrics, Thin films, Ionic conductors, University of Virginia, USA
Quanxi Jia, Superconductors, Ferroelectric/magnetic materials, Thin films, University of Buffalo, USA
C. Robert Kao, Metallic materials, Diffusion and joining, National Taiwan University, Taiwan
Edson Roberto Leite, Materials chemistry, Nanocrystals, Synthesis, Brazilian Nanotechnology National Laboratory, Brazil
Lei Liu, Semiconductors, Electronic structure, Spectroscopy, Changchun Institute of Optics, Fine Mechanics and Physics, China
Jörg Löffler, Metallic materials/synthesis and properties, ETH Zurich, Switzerland
Michele Manuel, Phase transformations, Materials design, University of Florida, USA
Michael E. McHenry, Magnetic materials, Carnegie Mellon University, USA
Scott T. Misture, In-situ diffraction, Electrochemically active ceramics, Alfred University, USA
Lakshmi S. Nair, Biomaterials, Tissue regeneration, Drug delivery, University of Connecticut, USA
Akira Nakajima, Photocatalysis, Surface regeneration, Ceramic processing, Tokyo Institute of Technology, Japan
Ceven Nan, Ferroelectric, Multiferroic materials, Tsinghua University, China
George M. Pharr, Mechanical behavior, Nanoindentation, Texas A&M University, USA
Joshua A. Robinson, 2D material synthesis and properties, The Pennsylvania State University, USA
Fabrice Rossignol, Ceramic processes, Additive manufacturing, CNRS, France
Edward M. Sabolsky, Electroceramics, Electrochemistry, Processing, West Virginia University, USA
Don W. Shaw, Epitaxy, Vapor deposition, Semiconductors, The University of Texas at Dallas, USA
Ziqi Sun, Energy nanomaterials, Wet chemical synthesis, Queensland University of Technology, Australia
Mitra Taheri, Metallic materials, Semiconductors, Complex Oxides, Johns Hopkins University, USA
Chongmin Wang, Energy storage, Microscopy, In-situ/operando technique, Pacific Northwest National Laboratory, USA
Sam Zhang, Thin films/coatings, Nanyang Technological University, Singapore
Yanchun Zhou, Structural ceramics, Electronic structure, Aerospace Research Institute of Materials and Processing Technology, China

NANOMECHANICS AND TESTING

ARTICLES

343–352 Extending the range of constant strain rate nanoindentation testing
Benoit Merle, Wesley H. Higgins, George M. Pharr

Syed Idrees Afzal Jalali, Praveen Kumar, Vikram Jayaram

362–371 High Throughput Determination of Creep Parameters Using Cantilever Bending: Part II - Primary and Steady-State through Uniaxial Equivalency
Syed Idrees Afzal Jalali, Praveen Kumar, Vikram Jayaram

372–379 Cumulative shear strain–induced preferential orientation during abnormal grain growth near fatigue crack tips of nanocrystalline Au films
Si-Xue Zheng, Xue-Mei Luo, Guang-Ping Zhang

380–390 Nanoindentation-induced deformation, microfracture, and phase transformation in crystalline materials investigated in situ by acoustic emission
Xiao-Guang Ma, Kyriakos Komvopoulos

ELECTRONIC, PHOTONIC AND MAGNETIC MATERIALS

ARTICLES

391–400 Enhancement of the optical properties of copper sulfate crystal by the influence of shock waves
Aswathappa Sivakumar, Madeswaran Sarumathi, Sathiyadhas Sahaya Jude Dhas, Sathiyadhas Amalapushpam Martin Britto Dhas

401–409 PbS and PbS/CdS quantum dots: Synthesized by photochemical approach, structural, linear and nonlinear response properties, and optical limiting
Mehdi Molaei, Masoud Karimipour, Samaneh Abbasi, Mohammad Khanzadeh, Masoud Dehghanipour

410–421 A systematic investigation on physical properties of spray pyrolysis–fabricated CdS thin films for opto-nonlinear applications: An effect of Na doping

422–429 Studies on the influence of structure units on the state of ytterbium ions in TeO2-based glasses
Yonggang Liu, Zhongyuan Lu, Jianjie Xu, Tengxiao Guo

BIOMEDICAL MATERIALS, REGENERATIVE MEDICINE AND DRUG DELIVERY

ARTICLE

430–441 A de novo theranostic nanomedicine composed of PEGylated graphene oxide and gold nanoparticles for cancer therapy
Hadi Samadian, Rahim Mohammad-Rezaei, Rana Jahanban-Esfahlan, Bakhshali Massoumi, Mojtaba Abbasian, Abbas Jafarizad, Mehdi Jaymand
