Invited Commentary
Correcting nutritional biomarkers for the influence of inflammation
D. I. Thurnham
761-762

Molecular Nutrition
Salivary leptin and TAS1R2/TAS1R3 polymorphisms are related to sweet taste sensitivity and carbohydrate intake from a buffet meal in healthy young adults
P. Han, R. S. J. Keast & E. Roura
763-770

Metabolism and Metabolic Studies
Prediction of a new body shape index and body adiposity estimator for development of type 2 diabetes mellitus: The Rural Chinese Cohort Study
C. Han, Y. Liu, X. Sun, X. Sun, Z. Zhang, R. Wang, Y. Ren, J. Zhou, Y. Zhao, Z. Zhang, L. Li, W. Zhang & H. Hu
771-776

Effect of citrus additions in fermented live vaccines on glucose kinetics in rats
777-783

Developmental Biology
Perinatal maternal high-fat diet induces early obesity and sex-specific alterations of the endocannabinoid system in white and brown adipose tissue of weanling rat offspring
784-803

Human and Clinical Nutrition
Milk vitamin D in relation to the ‘adequate intake’ for 0–6-month-old infants: a study in lactating women with different cultural backgrounds, living at different latitudes
804-812

Mono- and diglycerides improve lutein absorption in healthy adults: a randomised, double-blind, cross-over, single-dose study
B. J. Marriage, J. A. Williams, Y. S. Choe, K. C. Maki, M. Vurma & S. J. DeMichele
813-821

Barley β-glucan reduces blood cholesterol levels via interrupting bile acid metabolism
822-829

Dietary Surveys and Nutritional Epidemiology
Iron, zinc, vitamin A and selenium status in a cohort of Indonesian infants after adjusting for inflammation using several different approaches
830-839

The dietary diversity and stunting prevalence in minority children aged 3 years old: a cross-sectional study in city- and non-city areas of Western China
J. Wang, R. W. Shepherd, Y. Huang, G. Gu, Y. Yang, J. Jeong-Spalding, C. Me, H. Zhou & R. Wang
840-848

Intake of dietary fat and fat quality, and risk of premenstrual syndrome in the Nurses’ Health Study II
C. C. Epidemiology
849-857

A comparison of heart rate variability, n-3 PUFA status and lipid mediator profile in age- and BMI-matched middle-aged vegans and omnivores – CORRIGENDUM
A. M. Pinto, T. A. B. Sanders, A. C. Kendall, A. Nicolaou, R. Gray, H. Al-Khatib & W. L. Hall
877-877

877-877
The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health. Application of membership is limited to someone whose work has contributed to the scientific knowledge of nutrition, whatever each work has been in the laboratory, the field or the clinic, and whatever experimental, clinical, agricultural or industrial it is in; there is also a similar membership scheme with reduced subscription.

The British Journal of Nutrition is available online to subscribers at journals.cambridge.org/bjn

Directions to Contributors can be found at journals.cambridge.org/bjn
