THE CHART OF FOSSIL SHELLS FOUND IN CONNECTION WITH-THE SEAMS OF COAL AND IRONSTONE OF N. STAFFORDSHIRE.

SIR,—In reading Mr. Walcot Gibson's review I I was astonished to see it stated that "marine organisms are represented as occurring on three horizons," and also that the marine band above the Gin Mine has been omitted.

Writing with the Chart before me, and having personal knowledge of the bands, I should like to correct what seems to me an unaccountable error on the part of Mr. Walcot Gibson, who is usually so accurate in his statements. The fact is that eight distinct and separate marine bands are denoted, and moreover the Gin Mine is represented by figures.

The following are the horizons represented on the Chart as marine

beds, viz.:-

- 1. Bay Coal Band.
- 2. Priorsfield Band.
- 3. Gin Mine Band.
- 4. Single Two Feet or Moss Cannel Band.
- 5. Weston Sprink Band (horizon doubtful).
- 6. Seven Feet Banbury Band.
- 7. The Wetley Moor Coal Band.
- 8. The Four Feet or Crabtree Band.

I should like to call attention to another point, to which I should have expected Mr. Gibson specially to have referred. Various attempts have been made to correlate the seams of the several districts of this coalfield, generally on lithological or sequential evidence. On this Chart the seams of the whole coalfield have been successfully correlated for the first time, the marine bands forming sure data lines.

## OBITUARY.

## SAMUEL CHADWICK.

BORN 1845.

DIED MARCH 18, 1903.

The death is announced of Mr. Samuel Chadwick, who was one of the founders of the Malton Field Naturalists' Society, and devoted many years to the collection of fossils from the Jurassic and Cretaceous formations of East Yorkshire. He left his native county early in life to engage in sheep-farming in New Zealand, but he returned after a few years and resided for a long period at Malton, where his business afforded him numerous opportunities of prosecuting the geological studies in which he was deeply interested. His early colonial experiences led Mr. Chadwick to emigrate again to New Zealand with his family in 1895, and he died suddenly last March at Moastone Park, Waikopiro. His remarkable collection of
