ECONOMICS AND PHILOSOPHY

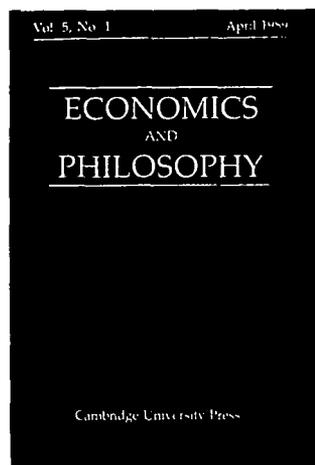

Cambridge
Journals

EDITORS:

Daniel Hausman, *University of Wisconsin*
Michael McPherson, *Williams College*

Economics and Philosophy is designed to foster collaboration between economists and philosophers and to bridge the increasingly artificial disciplinary boundaries that divide them. Frequently, economists acknowledge that their work in both positive and normative economics depends on methodological and ethical commitments that demand philosophical study and justification. Philosophers increasingly insist that philosophy of science must be informed by and tested against studies of current science and of its history, while ethics and political philosophy must depend on what we know about human aims and interests and about the principles, benefits, and drawbacks of different forms of social organization.

Third Edition

MICHAEL TRACY

"A classic, unique and irreplaceable" ROSEMARY FENNELL, University of Oxford.

Michael Tracy traces the historical origins of the CAP from the late nineteenth century through the crisis years of the 1930's with its new wave of protectionism to the formation of the Community and the CAP. The book demonstrates clearly the lasting effect on the CAP of this historical background and enriches our understanding of modern day problems. Since the second edition was published in 1982 there have been major changes in the CAP with repeated attempts at reform. Michael Tracy has completely updated and revised the recent material to reflect these changes to help bring this valuable work to the attention of the world again.

British Economic Policy 1931-49 Was There a Keynesian Revolution?

ALAN BOOTH

The influence of Keynes' ideas on British economic policy has produced a vast amount of literature. Alan Booth argues that much of this literature draws its analytical inspiration largely from economics and that a broader, interdisciplinary perspective can offer different insights. Thus he attempts to draw upon influences from economic history, economics, politics and sociology.

—Michael S. Smith, *University of South Carolina*
