WORKING TOGETHER FOR YOU

With over 1,000,000 patterns available at your fingertips, ICDD’s PDF® databases and MDI’s JADE® software work together to make your life easier. Let the software work for the science and take your results further.

ABOUT US

For over 30 years, The ICDD and MDI have worked together in a complementary manner since MDI began in 1987. The XRD community has trusted MDI to provide unbiased results and help interpret both the everyday and the difficult XRD data. We are proud of our products and the daily effort we put forth towards advancing the science of XRD. Materials Data creates XRD software applications to collect, analyze, and simulate XRD data. These products are here to help solve issues in an enormous array of materials science projects, and may be found in labs around the world with data collected on virtually every brand of XRD equipment.

OUR PRODUCTS

PDF-4+
Phase Identification and Quantitation
The world’s largest sources of inorganic diffraction data from crystals and powders in a single database featuring 460,900+ entries, including 353,300+ entries with atomic coordinates.

PDF-4+/Web
Data on the Go
Provides portability to the PDF-4+ database via the internet.

PDF-4/Axiom
Quality Plus Value
Phase identification and quantitation that requires diffraction equipment manufacturer or vendor software.

PDF-2
Phase Identification + Value
Quality and subfile filters combined with 71 different searches and 57 display fields enable you to target your results for more accurate identification.

PDF-4/Organics
Solve Difficult Problems, Get Better Results
Designed to solve difficult problems that are analyzed by powder diffraction analysis for a multitude of applications in the pharmaceutical, regulatory, specialty chemical, biomaterial, and forensic fields.

PDF-4/Minerals
Comprehensive Mineral Collection
Ninety-seven percent of all known mineral types, as defined by the International Mineralogical Association (IMA), are represented in the database, as well as many unclassified minerals.

JADE Pro
JADE Works The Way You Do
Automate your analysis with JADE. In so many cases, it’s just one click and you’re done. Often these results are better than those an experienced analyst could report and in a more timely manner.

On the Cover: The cover figures come from the article “Structural and Thermoelectric Properties of Pb₄In₂.₆Bi₃.₄Se₁₃” by W. Wong-Ng, Y. Yan, J. Guo, and J. Kaduk. The compound was prepared by solid-state techniques, and the structure was determined using powder X-ray diffraction methods. The low figure of merit (ZT) of about 0.175 at 700 K is low compared to that of commercial thermal electric B₃T₃.

GRANT-IN-AID FUNDS ARE AVAILABLE
DO NOT DELAY!
Proposal Submission Deadlines
31 January and 31 July

Does your research project involve the preparation and characterization of new materials using powder diffraction techniques?

If the answer is YES, then ICDD’s Grant Program is the perfect fit for you!

https://www.icdd.com/grant-in-aid

Please email sample patterns to: Denise DelCasale
ICDD Grant-in-Aid Coordinator
Delcasale@icdd.com

ICDD for over 80 years has been dedicated to collecting, editing, publishing, and distributing powder diffraction data for the identification of crystalline materials. To assist us in this growth, ICDD has called on researchers from around the world to contribute their experimental data. In return, ICDD supports their efforts by funds provided through our Grant-in-Aid Program.

ICDD’s approved grantees receive these additional benefits:
• A 50% price reduction on a PDF-4+ or PDF-4/Organics product
• Financial support to aid current research projects
• Publication of pattern(s) in the Powder Diffraction File™ (PDF®) once approved by the Editorial Department
• Acknowledgement of your publication in the PDF with a certificate
• First-time grantees receive a complimentary one-year subscription to Powder Diffraction Journal
