Cambridge’s economics list is renowned for the breadth and quality of its publishing.

Our book list is home to the work of some of the most important economists in the history of the discipline, most notably John Maynard Keynes, as well as the work of almost 30 Sveriges Riksbank Nobel Prize laureates, including Kenneth Arrow, Herbert Simon, Robert Solow and Joseph Stiglitz.

This is complemented by a cluster of key journals such as *Econometric Theory*, *Journal of Economic History* and *Journal of Financial and Quantitative Analysis*.

The Journal of Institutional Economics is owned by Millennium Economics Ltd, which has the following shareholders:
European Association for Evolutionary Political Economy (EPE) www.eape.org
Foundation for European Economic Development (FEED) www.fed-charity.org
Society for the Advancement of Socio-Economics (SASE) www.sase.org

**STATEMENT OF AIMS**
Institutions are the stuff of social and economic life. The importance of understanding such institutions in economic growth is now widely appreciated. The Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, households and other vital institutional and organizational contributions by all schools of thought that can contribute to our understanding of the features, development and functions of real-world economic institutions and organizations.

The Journal of Institutional Economics is an interdisciplinary journal that will be of interest to all academics working in the social sciences, including in economics, business studies, sociology, politics, geography, anthropology and philosophy. The Journal of Institutional Economics aims to provide all authors with an opportunity to present their articles within 30 days of submission.

**SUBMISSIONS**
All manuscripts must be submitted online via the website: http://mc.manuscriptcentral.com/joe

Detailed instructions for submitting manuscripts can be found at the submission website by clicking on the "Instructions for Authors and Forensic" link at the top right of the screen, and then clicking on the "For Authors only" option on the following page.

The Editor will acknowledge receipt of the manuscript, provide it with a manuscript reference number and assign it a reviewers. The reference number of the manuscript should be quoted in all correspondence with JOIE Office and Publishers.

**ARTICLE**
There must be no indication of the personal identity or institution of any author of the article within the article itself, or in the "footprint" of the electronic file. Normally, articles (including footnotes and references) must be no longer than 9,000 words. In special cases, such as an extended review or survey article, this limit may be extended to 12,000 words. A declaration of the total word count (including footnotes and references) must accompany or be within the article.

Papers with some formal content will be considered if it is fully explained for a general readership. The referees will be asked as much as possible to appendices, the assumptions have sufficient to accompany the appendix, the assumptions have sufficient in sufficient detail, and the paper enhances our understanding of past, present, or feasible socio-economic institutions. JOIE is not interested in the advancement of formal or economic techniques for their sake.

The first page of the electronic file of the article should include the following information: title, the abstract of the article of up to 150 words, the Journal of Economic Literature classification codes for the article (consisting of a single letter followed by two numbers [e.g., 08_34]), the article's online URL and, at the end, up to six key words or short phrases.

Footnotes should be kept to a minimum and the Harward referencing system should be used.

Submission of a paper will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere.

The JOIE Editors will preliminarily screen all papers. A paper will be retained at this first stage if it does not comply with the above guidelines, is evidently of insufficient academic quality or interest, or lies outside the scope of the journal. If a paper passes this preliminary assessment, then it will be sent out to referees. The Editors will make the final decision, taking account of the referee's report.

If the article is accepted, the author will be asked to comply with the format and house style guidelines above.

**AIMS**
"Institutions are the stuff of social and economic life. Many influential organizations, including the World Bank, have recognized the importance of institutions for economic success. The Nobel Prize has been awarded to Ronald Coase, Douglass North, Gary S. Becker and Simon Kuznets for their pioneering work in institutional economics.

This Journal of Institutional Economics is devoted to the study of the nature, role and evolution of institutions in the economy, including firms, states, markets, money, and other vital institutional and organizational contributions by all schools of thought that can contribute to our understanding of the features, development and functions of real-world economic institutions and organizations."

Many economists regard the principle of scarcity as central. However, this principle is not generally considered to scarce human cognitive or calculative deficits, those are often assumed to be unlimited. Furthermore, social institutions are often assumed to exist, freely available or priceable, or difficult in use, or impossible to produce, and thus human beings are reliant on social customs and institutions in order to make decisions. Institutional Economics addresses the issue of learning and cognition, and their relationship with institutional structures, cultures, routines and habits.

"This Journal of Institutional Economics is dedicated to the development of cutting edge research within the broad conception of institutional Economics. It encompasses research in both social theory and sociology, as well as economics, political science, history, psychology, philosophy, human sciences, and political economy. It embraces both formal and empirical research. It promotes theoretical and empirical research that enhances our understanding of the nature, origin, role and evolution of socio-economic institutions. Ideas from many disciplines, such as anthropology, biology, geography, history, politics, psychology, philosophy, and political economy, as well as economics itself, are important for this endeavor.

"Papers with some formal content will be considered if it is fully explained for a general readership. The referees will be asked as much as possible to appendices, the assumptions have sufficient to accompany the appendix, the assumptions have sufficient in sufficient detail, and the paper enhances our understanding of past, present, or feasible socio-economic institutions. JOIE is not interested in the advancement of formal, or economic techniques for their sake."

The reference number of the manuscript should be quoted in all correspondence with JOIE Office and Publishers.
