

ACKNOWLEDGEMENTS

Many people contributed to the success of this symposium. In particular we would like to thank the Spanish National Committee for Astronomy and the Spanish Navy for their support, and the Local Organising Committee and the staff of the Instituto y Observatorio de Marina for conducting the meetings, collecting and assembling the papers and the records of the discussions, and arranging a most enjoyable social programme. The editors gratefully acknowledge the help of Mrs Dorothy Outlaw and Miss Alice Babcock of the U.S. Naval Observatory and Miss Hilary Saunders of the Royal Greenwich Observatory in the preparation of this volume.
