Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK (for U.K. and elsewhere).

2015 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623) is

published bimonthly in February, April, June, August, October, and December by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 31 (2015): Institutions online only US \$616.00, and online only UK and elsewhere £353.00. Individuals online only US \$295.00, and online only UK and elsewhere £166.00. Single part: US \$113.00 in the U.S.A., Canada and Mexico; UK £65.00 and elsewhere. Online only for all institutions. Print editions ceased in 2014. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

Founding Editors: Egon Jonsson and Stanley J. Reiser

CONTENTS

Assessments

- 273** Cost analysis of intra procedural rapid on site evaluation of cytopathology with endobronchial ultrasound
Meena Kalluri, Lakshmi Puttagunta, Arto Ohinmaa, Nguyen Xuan Thanh and Eric Wong
- 281** Does one size fit all? Cost utility analyses of alternative mammographic follow-up schedules, by risk of recurrence
Taryn Bessen, Dorothy M.K. Keefe and Jonathan Karnon
- 289** Cost-effectiveness of radiofrequency ablation versus laser for varicose veins
Amanda C. Shepherd, Marta Ortega-Ortega, Manj S. Gohel, David Epstein, Louise C. Brown and Alun H. Davies
- 297** Interaction between objective performance measures and subjective user perceptions in the evaluation of medical devices: A case study
Matthew D. Haydock, Anubhav Mittal, Carissa F. Wilkes, David H. Lim, Elizabeth Broadbent and John A. Windsor

Methods

- 304** Assessment of MAST in European patient-centered telemedicine pilots
Anne Granstrøm Ekeland and Astrid Grøttland

Letter to the Editor

- 312** On the use of the MAST model in assessment of telemedicine: A comment on Ekeland and Grøttland
Kristian Kidholm, Lise Kvistgaard Jensen and Anna Kotzeva

Methods

- 314** Considering equity in health technology assessment: An exploratory analysis of agency practices
Dimitra Panteli, Julia Kreis and Reinhard Busse
- 324** Taxonomy of medical devices in the logic of health technology assessment
Cornelia Henschke, Dimitra Panteli, Matthias Perleth and Reinhard Busse
- 331** Headroom approach to device development: Current and future directions
Alan Girling, Richard Lilford, Amanda Cole and Terry Young

Policies

- 339** Patterns of onsite magnetic resonance imaging equipment among orthopedic practices
Robert Ohsfeldt, Pengxiang Li and John Schneider
- 347** Changing face of Medicare's national coverage determinations for technology
James D. Chambers, Matthew D. Chenoweth, Junhee Pyo, Michael J. Cangelosi and Peter J. Neumann
