305 Environment factors influencing the link between APOE e4 and Alzheimer’s disease (AD) risk
Alicia Gobes
Scope and contributions

International Psychogeriatrics is written by and for those doing clinical, teaching, and research work with older people. It is the official journal of the International Psychogeriatric Association (IPA) and is published by Cambridge University Press, Cambridge, UK. Although it is primarily concerned with psychogeriatrics, the journal welcomes contributions from all concerned with the field of mental health and aging. Original research papers are particularly sought. Contributions include original research articles, reviews of the literature, book reviews, letters to the editors, and editorials. Apart from editorials and book reviews, which are commissioned, contributions to International Psychogeriatrics are anonymously written and submitted by authors. Claims for missing issues should be made immediately on receipt of the subsequent issue.

Internet access

This journal is available on Cambridge Core service which can be found at www.cambridge.org/core. For further information please visit http://mc.manuscriptcentral.com/ipg.
