RESEARCH ARTICLES

211 Mayo Normative Studies: Regression-Based Normative Data for the Auditory Verbal Learning Test for Ages 30–91 Years and the Importance of Adjusting for Sex

227 The Effectiveness of Item-Specific Encoding and Conservative Responding to Reduce False Memories in Patients with Mild Cognitive Impairment and Mild Alzheimer’s Disease Dementia
C. Malone, K.W. Turk, B. Patelmo, A.E. Budson

239 Boosting Familiarity-Based Memory Decisions in Alzheimer’s Disease: The Importance of Metacognition
M. Geurten, E. Salmin, S. Willems, C. Bastin

249 Depressive Symptoms Differentially Predict Neocognitive in Latino and Non-Hispanic White People Living with HIV

261 Episodic Memory Impairment in Parkinson’s Disease: Disentangling the Role of Encoding and Retrieval
A. Sipior, F. Andrade

270 Functional Magnetic Resonance Imaging during Visual Perception Tasks in Adolescents Born Prematurely
A. Lind, L. Hestorp, M. Lewenstein, V. Saarenvuo, H. Reit, T. Lehtonen, P. Verkkonen, K. Gualtieri, K. Lohi, T. Parkkila on behalf of the PIPARI Study Group

282 Music Playing and Intrahemispheric Communication: Older Professional Musicians Outperform Age-Matched Non-Musicians in Fingertip Cross-Localization Test
M. Piccirilli, M.T. Palermo, A. Germani, M.L. Bertelli, V. Ancarano, L. Busetti, M.S. Gregorini, L. Scarpini, P. O’Callaghan

293 Normative Data for the ELSA-Brasil Neuropsychological Assessment and Operationalized Criterion for Cognitive Impairment for Middle-Aged and Older Adults
