JOURNAL OF APPLIED PROBABILITY

JOURNAL OF APPLIED PROBABILITY

This is an international journal published by the Applied Probability Trust in association with the London Mathematical Society; it contains research papers and notes on applications of probability theory to the biological, physical, social and technological sciences. An annual volume of approximately 1100 pages is published in four issues appearing in March, June, September and December.

All correspondence relating to the submission of papers should be sent to:
Executive Editor, Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK. Subscription rates and notes for contributors are to be found on the inside back cover.

FORTHCOMING PAPERS

ALPERN, STEVE, BASTON V. J. AND ESSERGAIER, SKANDER. Rendezvous search on a graph

ASMUSSEN, SØREN AND TUROVA, TATYANA S. Stationary properties of neural networks

AYHAN, H., LIMON-ROBLES, J. AND WORTMAN, M. A. On the time-dependent occupancy and backlog distributions for the $GI/G/\infty$ queue

BARNES, GEORGE R., CERRITO, PATRICIA B. AND LEVI, INESSA. Random walks on finite semigroups

BEAN, NIGEL, GREEN, DAVID AND TAYLOR, PETER. The output process of an $MMPP/M/1$ queue

BENHENNI, KARIM. Approximating integrals of stochastic processes: extensions

BRITTON, TOM. On critical vaccination coverage in multitype epidemics

BRUSS, F. THOMAS AND LOUCHARD, GUY. Sharp bounds for winning probabilities in the competitive rank selection process

BRUSS, F. THOMAS AND SLAVTCHOVA-BOJKOVA, M. On waiting times to populate an environment and a question of statistical inference

CHICK, STEPHEN E. AND MENDEL, MAX B. New characterizations of the no-aging property and the ℓ_1-isotropic model

CHOW, YUNSHYONG AND ZHANG, YU. Inequalities for the score constant in matching random sequences

CRUZ, J. R. AND DOREA, C. C. Y. Simple conditions for the convergence of simulated annealing type algorithms

DALEY, D. J. AND SERVI, L. D. Idle and busy periods in stable $M/M/k$ queues

DEL MORAL, P. A uniform convergence theorem for the numerical solving of the nonlinear filtering problem

DSHALALOW, JEWGENI H. Queueing processes in bulk systems under D-policy

DOWN, D. On the stability of polling models with multiple servers

FERRARI, PABLO A. AND GARCIA, NANCY LOPES. One-dimensional loss networks and conditioned $M/G/\infty$ queues

FLORENS-LANDAIS, DANIELLE AND PHAM, HUYÊN. Large deviations in estimation of an Ornstein–Uhlenbeck model

GRAVERSEN, S. E. AND PEŠKIR, G. Optimal stopping and maximal inequalities for geometric Brownian motion

GUERRY, M. A. Using fuzzy sets in manpower planning

JACKA, S.D. Keeping a satellite aloft: two finite fuel stochastic control models

JIANG, XIAOYUE, CHENG, KAN AND MAKIS, VILIAM. On the optimality of repair-cost-limit policies

JONES, OWEN D. Continuity for multi-type branching processes with varying environments

KANG, SUNGYEOL AND SERFOZO, RICHARD F. Extreme values of phase-type and mixed random variables with parallel-processing examples

KELLA, OFFER AND WHITT, WARD. Linear stochastic fluid networks

KOEHL, PIERRE-F, PHAM, HUYÊN AND TOUZI, NIZAR. Hedging in discrete-time under transaction costs and continuous-time limit

KORILIS, Y. A., LAZAR A. A. AND ORDA, A. Avoiding the Braess paradox in noncooperative networks

KYPRIANOU, A. E. Slow variation and uniqueness of solutions to the functional equation in the branching random walk

LIKHANOV, NIKOLAY AND MAZUMDAR, RAVI R. Cell loss asymptotics for buffers fed with a large number of independent stationary sources

LIU, ZHEN, NAIN, PHILIPPE, TOWSLEY, DON AND ZHANG, ZHI-LI. Asymptotic behavior of a multiplexer fed by a long-range dependent process

LÓPEZ-MIMBELA, J. ALFREDO AND WAKOLBINGER, ANTON. Length of Galton–Watson trees and blow up of semilinear systems

MOUSTAKIDES, GEORGE V. Extension of Wald's first lemma to Markov·processes

PHATARFOD, R. M. AND PRYDE, A. J. P. On some multi-request move-to-front heuristics

PLATEN, ECKHARD. Axiomatic principles for a market model

POLLETT, P. K. Quasistationary distributions for continuous time Markov chains when absorption is not certain

QUINE, M. P. AND LAW, J. S. Modelling random linear nucleation and growth by a Markov chain

QUINE, M. P. AND SZCZOTKA, W. Existence and positivity of the limit in processes with a branching structure

REZA SOLTANI, A. AND KHORSHIDIAN, K. Reward processes for semi-Markov processes: asymptotic behavior

RHEE, WANSOO T. Tight bound of random packing

ROBIN, S. AND DAUDIN, J. J. Exact distribution of word occurrences in a random sequence of letters

ROTHMANN, MARK D. AND RUSSO, RALPH P. Weak convergence on randomly deleted sets

SCARSINI, MARCO AND SPIZZICHINO, FABIO. Simpson-type paradoxes, dependence, and ageing

SGIBNEV, M. S. On the existence of submultiplicative moments for the stationary distributions of some Markovian random walks

STADJE, WOLFGANG. Stationarity in a stochastic population flow model

TSAKLIDIS, GEORGE M. The stress tensor and the energy of a continuous time homogeneous Markov system with fixed size

VAN DEN BERG, J. AND ERMAKOV, A. On a distributed clustering process of Coffman, Courtois, Gilbert and Piret

VAN DER MEI, R.D. Delay in polling systems with large setup times

WALKER, D. M. The expected time till absorption when absorption is not certain

WANG, HAN-XING. Extinction of population-size-dependent branching processes in random environments

WARREN, DI. The Frobenius–Harper technique in a general recurrence model

WEBA, MICHAEL. Bounds for the total variation distance between the binomial and the Poisson distribution in case of medium-sized success probabilities

YAO, YI-CHING AND IYER, HARI. On an inequality for the normal distribution arising in bioequivalence studies
