Demographic variables such as fertility, mortality, migration and family structures notably respond to economic incentives and in turn affect the economic development of societies. *Journal of Demographic Economics* welcomes both empirical and theoretical papers on issues relevant to Demographic Economics with a preference for combining abstract economic or demographic models together with data to highlight major mechanisms.

The journal was first published in 1929 as *Bulletin de l’Institut des Sciences Economiques*. It later became known as *Louvain Economic Review*, and continued till 2014 to publish under this title. In 2015, it moved to Cambridge University Press, increased its international character and changed its focus exclusively to demographic economics.

**Editors-in-chief:** DAVID DE LA CROIX, Université catholique de Louvain

**Co-editor:** MURAT IYIGUN, University of Colorado

**Editorial Assistant:** SÉBASTIEN SCHILLINGS, Université catholique de Louvain
