The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTED BY
W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

United States of America

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

PRESCRIBE THE EASY EFFECTIVE METHOD

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

DROPPER ?

**DeVilbiss
ATOMIZERS**

ATOMIZER ?

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

PENICILLIN LOZENGES—M&B

PENICILLIN LOZENGES—M & B are designed for the oral treatment of all infections of the mouth and throat which are known to be caused by organisms sensitive to Penicillin, notably Vincent's infection.

Each lozenge contains 500 international units of Penicillin (Calcium Salt) in a special lozenge base. They will retain their potency for approximately four months under ordinary cool conditions, and longer when refrigeration is possible.

Containers of 25 lozenges.

**THE INSTITUTE OF LARYNGOLOGY
AND OTOTOLOGY**

330/332 GRAY'S INN ROAD, LONDON, W.C.1

in association with

The Royal National Throat, Nose and Ear Hospital

**A COMPREHENSIVE COURSE IN
Laryngology, Rhinology and Otology**

will be given from

6th January to 23rd May, 1947

The course has been designed to cover the whole field of the Speciality, commencing with a series of lectures and demonstrations on the anatomical and physiological aspects (with facilities for dissection).

In addition to systematic clinical teaching, it includes lectures and demonstrations on the pathological, bacteriological, radiological and other aspects of the Speciality as well as in allied and ancillary departments of medicine and surgery.

Applications for enrolment should be made to the Dean not later than the 31st December, 1946.
