The Journal welcomes submissions of articles that evaluate health technologies to support health policy or practice decisions, or discuss methods of assessing such technologies; please see Journal Aims and Scope for details. Manuscripts not covered by the Editors and members of the Editorial Board. Those that pass proceed to an international review process, which usually is completed within 4 to 6 weeks. Accepted manuscripts will be published within 4 to 6 months. Articles must be in English. Spelling, punctuation, and punctuation should conform to the 15th Edition of The Chicago Manual of Style (University of Chicago Press).

MANUSCRIPT SUBMISSION AND REVIEW. All manuscript submissions to the International Journal of Technology Assessment in Health Care must be made electronically via ScholarOne Manuscripts, at the website:

http://mc.manuscriptcentral.com/ijtahc

Please follow the detailed instructions on the website to avoid delays. The authors are asked to provide contact information and they may suggest reviewers. The website automatically acknowledges receipt of the manuscript and provides a manuscript reference number. Every effort will be made to provide the author with a rapid review. Correspondence must quote manuscript reference number and should be sent by email to the Editorial Office at IJTAHC@thl.fi.

PREPARATION OF MANUSCRIPT. The manuscript, including all references, must be provided in Word or RTF format, double spaced on 8½ x 11 inch or A4 page sizes, with at least 1-inch (2.5 cm) margins. Manuscripts should typically have less than 4,000 words, including the abstract of 250 words maximum, and usually no more than 25 references. Manuscripts should be arranged as follows: 1) cover sheet with title; 2) abstract and keywords; 3) acknowledgments, including source of funding; 4) text; 5) references; 6) tables with titles; and 7) figures, with captions on a separate page.

The Journal accepts no more than four tables or figures altogether for the published version. Tables and figures exceeding these limits may be published on the Journal’s web site (www.journals.cambridge.org) as supplementary materials. Supplementary tables and figures should be numbered separately from the text and figures in the published issue, beginning with Supplementary Table 1 and Supplementary Figure 1. The Journal does not accept footnotes or appendices.

Where relevant, manuscripts should include a paragraph on the policy implications of the findings of the study. Acronyms should be clearly spelled out on first use. The use of product trade names should be avoided; generic names should be used except where discussion of proprietary brands is essential to the manuscript.

COVER SHEET AND COVER LETTER. A cover letter, signed by all authors, must state that each author contributed to the conception and design of the study and interpretation of the data and the writing of the paper; 2) each has approved the version being submitted; and 3) the content has not been published nor is being considered for publication elsewhere.

As relevant to the content of the paper, the letter should also attest to the fact that any research with human or animal subjects conforms to the legal and ethical standards of the country in which it was performed. All authors must declare any financial arrangements with companies whose products are discussed in the paper or their competitors; such information will not be revealed to reviewers but may be included in a suitable format in the final publication if the manuscript is accepted.

Access the Conflict of Interest disclosure form at http://www.cambridge.org. The cover sheet should also provide all authors full names, professional degrees, and institutional mailing addresses.

Open Access. Our standard copyright forms allow Open Access Archiving (for instance posting the Accepted Manuscript in an Institutional Repository or on a personal webpage). Authors can also choose to publish Open Access (making articles freely available for non-commercial use) in a large number of our Journals by using Cambridge Open Option. For complete details, please visit http://journals.cambridge.org/OpenAccess

COPYRIGHTING AND PROOFREADING. The publishers reserve the right to copyedit and proofread all accepted articles. Page proofs will be sent to the lead author for final review.

Reprints. Reprints may be purchased if ordered at proof stage.
EDITORIAL
Schüler and Söderholm Werkö: INAHTA stories from the front lines of HTA impact

THEME SUBMISSIONS
Aleman and Perez Galan: Impact of HTA on judicialization of health rights
Truchon et al.: Shaping quality in Quebec trauma network
