Health Economics, Policy and Law

Published in association with LSE Health

Editor-in-Chief

Adam Oliver, *London School of Economics and Political Science, UK*

International trends highlight the confluence of economics, politics and legal considerations in the health policy process. *Health Economics, Policy and Law (HEPL)* provides a forum for inter-disciplinary health policy studies, and will be of use to academics, policy makers, health care managers and professionals. *HEPL* is international in scope, publishing both theoretical and applied work, with articles on all aspects of health policy. *HEPL* is particularly interested in publishing innovative ideas that promise to contribute to improving health and healthcare policy. Considerable emphasis is placed on rigorous conceptual development and analysis, and on the presentation of empirical evidence that is relevant to the policy process. Review articles and debate sections bring readers in touch with current research developments and issues.

Cover Artwork

Transparent Cut, textured acrylic on board by Jaroslava Sobiskova

A native of the Czech Republic, Ms. Sobiskova came to the U.S. in 1986 seeking a life of greater artistic freedom. After earning an MFA degree from the University of Wisconsin, she returned to the Czech Republic to participate in that country's renaissance, directing the Civic Forum Foundation there for one year. She returned to the U.S. and operated a private gallery in Chicago while doing commission work in painting and murals. Later she settled in Madison, Wisconsin with her family.

In her works Ms. Sobiskova moves between abstract and figurative representations of a subject depending on the story she is trying to describe. This image is part of her Garden Series where the paintings are loosely based on floral motifs.

Ms. Sobiskova's work can be viewed at www.jaroka.ws/paintings.html or contact the artist at jaroka@jaroka.ws

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
