Review Papers for the

Advances in Applied Probability

The Editorial Board would like to encourage the submission to the Advances of Review Papers summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length. On acceptance of a Review Paper for publication in the Advances, the author will receive £stg. 100 (U.S. $240).

In addition to these Review Papers, Advances is also designed to be a medium of publication for (1) long research papers in Applied Probability, which may include expository material, (2) expository papers on branches of mathematics of interest to probabilists, (3) papers outlining areas in the biological, physical, social and technological sciences in which probability models can be usefully developed, and finally, (4) papers in Applied Probability presented at conferences which do not publish their proceedings.

In short, the main function of Advances is to define areas of recent progress and potential development in Applied Probability. As with the Journal of Applied Probability, Advances undertakes to publish papers accepted by the Editors within 15 months of their submission.

The third number of Advances contains the following papers:

Harry Kesten

Quadratic transformations: a model for population growth. I.

A. W. Davis

Some generalizations of Bailey’s birth death and migration process

Donald L. Iglehart and Ward Whitt

Multiple channel queues in heavy traffic

Marcel F. Neuts

Two servers in series, studied in terms of a Markov renewal branching process

Subscription rates (post free) per volume are:

For libraries and institutions: U.S.$13.00 £stg.5.5.0. $A.11.00

For individuals belonging to a recognised scientific society: U.S.$8.00 £stg.3.6.0. $A.7.20

Cheques made out on U.S., U.K. and Australian banks will be acceptable; they should be made payable to Applied Probability, and sent to:

Editorial Assistant, Advances in Applied Probability,
Department of Probability and Statistics,
The University, Sheffield, S3 7RH, England.
Methuen's Supplementary Review Series in Applied Probability

General Editor: M. S. BARTLETT, M.A., D.SC., F.R.S.
Editor: J. GANI, D.I.C., PH.D.

This supplementary series consists of the Review Papers from the first four volumes of the Journal of Applied Probability in book form. The volumes are written in a simple expository style, and provide research workers and students of Applied Probability with concise accounts of work done in their fields. The eight volumes deal with the applications of Probability Theory to the biological, chemical and technological sciences.

Volume 1. TIME-DEPENDENT RESULTS IN STORAGE THEORY
by N. U. Prabhu
Volume 2. DIFFUSION MODELS IN POPULATION GENETICS
by M. Kimura
Volume 3. GROUP REPRESENTATIONS AND APPLIED PROBABILITY
by E. J. Hannan
Volume 4. STOCHASTIC MODELS FOR BACTERIOPHAGE by J. Gani
Volume 5. RECENT RESULTS IN INFORMATION THEORY by S. Kotz
Volume 6. ON THE ALGEBRA OF QUEUES by J. F. C. Kingman
Volume 7. COMPLETE EXPONENTIAL CONVERGENCE AND SOME RELATED TOPICS by C. R. Heathcote
Volume 8. STOCHASTIC APPROACH TO CHEMICAL KINETICS
by D. A. McQuarrie

Orders for these should be made through your bookseller or direct from:
Methuen & Co. Ltd.
11 NEW FETTER LANE, LONDON EC4

Mathematical Spectrum

A Magazine of Contemporary Mathematics

This magazine addresses itself primarily to young mathematicians in schools, colleges of education, and universities. Its object is to discuss the entire range of modern mathematical disciplines (pure mathematics, applied mathematics, statistics, operational research, computing science, biomathematics) in an informative but informal manner and to relate discoveries in mathematics to progress in the natural sciences, technology, social studies, and business management.

The Editors believe that the process of learning is a dialogue, and consequently they wish to promote active participation by readers. Correspondence on any subject relating to mathematics and mathematical education is welcomed. There is also a problem section, and readers are encouraged to submit their solutions, the best of which are published.

For a descriptive leaflet, rates of subscription, and order form, application should be made to
The Oxford University Press, Walton Street, Oxford.

Mathematical Spectrum is published by Oxford University Press on behalf of the Applied Probability Trust.
ADAPTING TO INNOVATION

by

D. ELIZUR

Departments of Psychology and Business Administration, Bar Ilan University, Ramat Gan, Israel

The research area
The main concepts
A STRUCTURAL THEORY OF BEHAVIOR IN ORGANIZATIONS
Facet theory
A facet definition of behavior in organizations
The complete research design
Towards the formation of hypotheses
Design of the empirical research project
Task and structure of the organizations

CONVENTIONAL ANALYSIS
The population
The relation of employees to the computer
Information about the computer
Work and position changed by the computer
Anxiety about the computer and resistance
Effects of the computer
Cognition of work aspects
Job satisfaction
Leadership atmosphere-supervisory practices

STRUCTURAL ANALYSIS
Facet analysis
Behavior towards the computer
Behavior towards the work
Structure of the referent relations
Relations between different kinds of behavior
Facet analysis provides a new approach
to the study of organizations

IMPLICATIONS OF THE RESEARCH DATA
Implications for organizations
Research implications

APPENDIX
The questionnaire
Correlation tables

Subscription rates

Subscriptions (post free) for the 1970 volume of the Journal are:

U.S. $17, £stg. 7.0.0, $A.15.00, for libraries and institutions;

U.S. $8, £stg. 3.6.0 $A.7.20, for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the Journal.

All enquiries about the Journal, as well as other subscriptions and orders for back numbers should be sent to the Editorial Assistant, Miss M. Hitchcock, Department of Probability and Statistics, The University, Sheffield, S3 7RH, England. The price of back numbers is $19.50, £stg. 8.0.0.

$A. 17.00 per volume. Cheques, money orders, etc. should be made out to Applied Probability; cheques on U.S., U.K. and Australian banks will be acceptable.

Notes for Contributors

It is a condition of publication in the Journal of Applied Probability that papers shall not previously have appeared elsewhere, and will not be reprinted without the written permission of the Trust. The copyright of all published papers shall be vested in the Trust. It is the general policy of the Journal not to accept for publication papers which cannot appear in print within 15 months of their date of submission. Authors will receive 100 reprints of their papers free, and joint authors a proportionate share of this number. Additional reprints will be provided at cost.

Manuscripts should be written in English or French; manuscripts in other languages may be accepted by the Editors, but will appear (subject to the author’s agreement) in English or French translation in the Journal.

It will be of help to the Editors if the following conventions are adopted:

a) The manuscript should be typewritten, using double spacing. On one side of the paper only. The original and a copy may be submitted to any Editor; a duplicate of the covering letter should, however, be sent to the Editor-in-Chief.

b) References should be indicated in the text by the name of the author(s) and the date, thus: Feller (1961), and the full references listed at the end of the article in alphabetical order. Journal references should include the title of the article cited, the title of the journal (abbreviated in the style of the International Journal of Abstracts: Statistical Theory and Method) the volume, and inclusive page numbers. Book references should give the full title, the publisher, and the place of publication. For example:

c) Type faces should be carefully distinguished on the manuscript using the following standard methods of marking:

Italic capitals (T, I, R) and lower case letters (t, i, r) should be underlined once, e.g.,

T, I, R, t, i, r.

Bold-face capitals (T, I, R) and lower case letters (t, i, r) should have a curly underline, e.g.,

T, I, R, t, i, r.

Greek characters (α, β, θ) and script letters ((serializer, R) should be carefully drawn and identified when first used by a marginal note of the form ‘α—lower case Greek alpha’ or ‘ serializer R’.

d) Indices and subscripts should be clearly distinguished, using the marking $\hat{a}, \tilde{a}$ where necessary.

Authors will receive only first proofs for correction; charges will be made for excessive alteration to these.

Printed in Israel at the Jerusalem Academic Press, P.O.B. 2390, Jerusalem.
