JOURNAL SUBSCRIPTION (MBA price added to the above membership fees, with the exception of YMB as no journal option for this category):

- Online journal: £200.00
- Print journal: £500.00
- Print and Online journal: £700.00

The Marine Biological Association of the United Kingdom

The Association is a learned society founded in 1884 and incorporated by Royal Charter in 2013. The Marine Biological Association (MBA) provides a unified, clear, independent voice on behalf of the marine biological community. In 1884, the MBA opened the Plymouth laboratory at Citadel Hill.

The MBA is also a registered charity with key aims being to promote scientific research into all aspects of life in the sea, including the environment, including the impact on it which depends on it, and to disseminate to the public the knowledge gained. The Patron of the Association is His Royal Highness the Duke of Edinburgh, who is also an Honorary Fellow. The other Honorary Fellows are His Serene Highness Prince Albert of Monaco, Dr Sylvia Earle, Sir Tim Hunt and Professor James Lovelock.

The work of the Association is controlled by the Council elected annually by its subscribing members.

The Marine Biological Association, under the direction of its Council, has undertaken research in all branches of marine science and many of the results have been published in this Journal. An account of the history of the first hundred years of the Association and Journal may be found in Volume 1 (pp. 883 and 463). Since its foundation the Association has been supported by grants from Research Councils and by subscriptions and donations from private members, universities, learned societies, the Fishmongers’ Company and other public bodies.

The Plymouth Laboratory was opened in 1884 and, since that date, considerable additions have been made to the buildings, including a library, resource centre, extensive laboratory accommodation and washing facilities.

The Association and the research programme are based entirely at the Citadel Hill Laboratory. The building is shared with SAHOS (Sir Alister Hardy Foundation for Ocean Science). The Marine Biological Association retains the lease of the building on Citadel Hill and continues as a very active scientific learned society with a large international membership. The MBA manages a research programme carried out by research fellows together with scientific visitors, publishers and International Annual Report, Newsletters and organizes scientific meetings.

Subscriptions can be paid by cash/cheque, direct debit from a UK bank account or credit card. Subscriptions are reduced by £5 per annum if paying by direct debit.

Members of the Association have a wide range of rights and privileges including the use of post-nominals (FMBA for MBA Fellow, Mem MBA for Professional Member) and being entitled to receive the Marine Biologist Magazine. The Commissioners of Inland Revenue have approved the Association for the purposes of Section 106, Finance Act, 1950, and that the whole of the annual subscriptions paid by a member who qualifies for relief under the section will be allowable as a deduction from his earnings assessable to income tax.

All correspondence should be addressed to: The Membership Secretary, Marine Biological Association, The Laboratory, Citadel Hill, Plymouth, PL1 2PB, UK. Tel: +44 (0) 1752 633102, Fax: +44 (0) 1752 633100; email: membership@mba.org.uk
